

I am incredibly concerned by the Application and the other three that will make up the whole 10000 acres.

I can only make the same comments as I have had to make over the last two years -

- the project is far too big - it will affect the emotional, physical and mental health of 40,000 people living in this rural area !

A catastrophe waiting to happen.

- the solar panels should not be placed on any grade of farm land. The correct place for solar panels is on buildings of houses and on industrial sites. At a crucial time, with a war on the edge of Europe we should be focusing on growing food and maintaining food security.
