

As a long time resident of nearby village I submit my very strong objection to the Tillbridge solar project. On the following grounds

A) destruction of local wildlife and amenities

B) Solar energy is not efficient and not a green way of harnessing low carbon power .

C) Danger of being obsolete and a waste of resources as more efficient ways are harnessed.

D) This and nearby other huge solar arrays use valuable agricultural land, which may be vital to our country's need for growing

food crops .

E) General well-being and Mental health of the local population taking away enjoyment of the rural area .
