

I have sent names and addresses of residents, that will be adversely effected by the solar farm being built close to their homes, and are requesting that the Inspector visits their homes to see for his self. This information has been sent both to Boom and The Inspectorate's case workers.

I also asked that Mr David Davis accompanied the Inspector on his site visit and that his preferred day was a Friday. I also requested to attend the accompanied site visit myself and also another local resident from Spaldington.
