Mr. Davis,

You need to look at the 'Circular' pattern of Solar Panel Field Stations which surround Cottage Farm off Ings Lane, Spaldington.

When you actually read section 16 of the attached document? you will see that much of the potential health hazards are 'UNKNOWN'!

The 'ELV' (exposure limit values) is quoted and exploited and 'Action Levels' etc etc . It the most documented application I have seen on shoving something under the carpet!

EIA on wildlife? The fact that migratory and non migratory birds will see these large glass areas as 'LAKES' from altitude and will land on them seems irrelevant?(and damage both glass and bird?) ALL after they have survived the gauntlet of 'Bird Choppers' already installed in the East Riding.

Agricultural land for food production annually?, Wheat, Barley, Rape and Beans to mention a few will be lost.

How many 'Microteslas' will the Sheep grazing under Acres of Solar Panels be exposed to?

The 32kv threshold? the developer seems to be placing all his bets on this parameter? WHAT when several Field Stations are close together and their footprints overlap each other?

Public Rights of Way? The developers initiative to construct 'Permissive Footpaths' raises many questions?

Directly walking alongside or on top of cable infrastructure, restricting Agricultural Pest Control by allowing Public Access to the adjacent WORKING farms and also lowers the privacy and security of residents. i.e. Poachers will no doubt exploit ANY new land access in the area. Hare Coursing and Deer Poaching the main two concerns.

Can you ask the HSE and OEP for their opinions and recommendations regarding EMF from this and any other existing and planned Solar Panel Developments?

Regards.....Andy

Good morning Andy

Thank you for your email below and apologies for the length of time it has taken to respond.

There are no UK safety regulations for solar panel field stations and their proximity to property.

An EMF study was part of one of our planning applications and the document can be found on the link below. Section 16.8 is all about EMF

I hope this helps

EMF and Heath From large developments?

Message:
Hello,

What are the current UK safety requirements for Solar Panel Field Stations and their proximity to residents property?
i.e from large agricultural solar panel developments etc.
The EMF emitted from inverter technology is what concerns me and any other associated hidden EMF health hazard.

Regards.....Andy

Subject: Johnons Farm Solar Boom Access? ...A614 Alternative?

You don't often get email from [REDACTED]@yahoo.co.uk. [Learn why this is important](#)

[Warham Farm / Warham Bungalow - Google Maps](#)

Can anyone tell me WHY they(Solar Boom) want to cause absolute chaos and carnage including long established natural habitat to the people of Spaldington(population Circa 200) when there is ALTERNATIVE access possibilities off the main Trunk Route the A614 if the application goes ahead?

Johnsons Farm is supposed to be their HQ? Access to A614 closest point is near the bottom of Ings lane?

Has this been discussed by anyone local in Spadington and challenged the developer on this point?

I feel its a valid point to use AGAINST the proposed access?

What are the Health Risks when Living Near Solar Farm Places in 2022? | ...

Are you considering moving to a home that is near a solar farm?
Solar farms are becoming more and more popular a...

See attachment showing location of Solar Boom 'Field Stations' SURROUNDING Cottage farm at Spaldington(DN14)

SEVEN Field Stations in total surround Cottage Farm.

Question:

What are the LEGAL recommended distances from a Solar Panel Filed Station and its proximity to a dwelling?

The footprint from SEVEN Field Stations radiating EMF will be considerable? One Field Station is VERY close to the farm.

The effect on Human Health?

The developer has not answered the same question!
