

As a resident living a mile away I feel the project will industrialize a very rural area. Cumulatively this area including Camblesforth, Spaldington, East Cottingwith, Allerthorpe will massively change. We will be part of the industrialised north. People will avoid visiting, roads will lose their charm. There will be noise from piling and lorries. We already have an overload of wind turbines in this area. The project is far too expansive for this rural area. It is affecting our mental health, I wholeheartedly object to the scale of this project.
