

## **APPENDIX C: EXAMINATION LIBRARY**

This Examination Library relates to the Hinkley Point C Connection (HPCC) Development Consent Order application. The library lists each document submitted to the examination by any party or issued by the Planning Inspectorate (the Inspectorate).

All documents listed have been published to our website and a hyperlink is provided for each document.

A reference number has been given to each document. These references have been used in the Report on the Implications for European Sites (RIES), and will also be used in the Examining Authority's (ExA) Recommendation Report.

The documents within this library are categorised either by document type or by the deadline to which they were submitted. An index to the categories used follows this preamble.

Please note the following:

- Advice under Section 51 of the Planning Act 2008 that has been issued by the Inspectorate, in relation to this application, has been published to our website. Such advice is not an examination document and has therefore not been included in this library.
- This library references documents from the point the application was submitted on 24 May 2014, apart from the Transboundary Screening Matrix which precedes this date.
- The order of documents within each sub-section is chronological, numerical, or alphabetical and confers no priority or higher status on those that have been listed first.
- Non-applicant documents have been referenced according to the index i.e. an alphabetical prefix followed by a number.

A small number of Applicant documents also use the above non-applicant convention, where the Applicant did not provide their own reference number. In all other cases Applicant documents have been listed by retaining the reference number provided at submission, i.e. numerical, with some having an alphabetical and/or word suffix.
