APPENDIX L1: Section 42(1)(d) Consultee List (March 2023)

S42(1)(d) Consultees- Additional consultation

This appendix provides a list of those consulted after the main period of Statutory Consultation and Targeted Consultation on the Scheme under section 42(1)(d) of PA 2008 in February 2023 as part of the additional consultation.

Appendix L5 contains details about letters that were returned to sender or undelivered and the relevant actions taken, including extensions to the consultation dates as required.

APPENDIX L2: Section 42(1)(d) Letters (March 2023)

L2.1: Section 42(1)(d) Letter to PILs who had Previously been Consulted

IMPORTANT: THIS COMMUNICATION AFFECTS YOUR PROPERTY

Dear Name

23 February 2023

Bramford to Tinstead Reinforcement

Consultation Notice under Sections 42 and 44 of the Planning Act 2008

We previously wrote to you to consult you on National Grid Electricity Transmission plc's (here on referred to as National Grid) proposals to reinforce the transmission network between the existing Bramford Substation in Suffolk, and Tinstead Tee in Essex. We are now writing to you to consult you on some changes we propose to make prior to submitting our Application for development consent.

Our proposals

The reinforcement would comprise up to 18 km of overhead line (consisting of approximately 50 new pylons, and conductors) and 11 km of underground cable system (consisting of up to 21 cables with associated joint bays and above ground link pillars).

Four Cable Sealing End (CSE) Compounds would be required to facilitate the transition between the overhead and underground cable technology. The CSE would be within a fenced compound, and contain electrical equipment, support structures, a small control building and a permanent access track.

It is proposed that approximately 27 km of existing overhead line and associated pylons would be removed as part of the proposals. This would comprise 25 km of existing 132 kV overhead line between Burstall Bridge and Tinstead Tee, and 2 km of the existing 400 kV overhead line to the south of Tinstead Tee. To facilitate the overhead line removal, a new grid supply point (GSP) substation is required at Butler's Wood, east of Wickham St Paul, in Essex. The GSP substation would include associated works, including replacement pylons, a single circuit sealing end

compound and underground cables to connect the substation into the existing 400 kV and 132 kV networks.

Other ancillary activities would be required to facilitate construction and operation of the project. These would include modifications to sections of the existing 400 kV overhead line, temporary working areas, diversion of third-party assets, land drainage from the construction and operational footprint, and land required for mitigation and Biodiversity Net Gain.

The project meets the threshold as a Nationally Significant Infrastructure Project (NSIP), as defined under Part 3 of the Planning Act 2008 (“the Act”), hence National Grid requires a development consent order (DCO).

Proposed changes to the project

Since our consultations last year, further work has been undertaken to progress the design of the project, and we have carefully considered all feedback received. As a result, **we have made changes to the Project which affect your interest in land, so we are consulting you under Sections 42 and 44 of the Act.**

These include:

- Realignment of the proposed temporary haul road between the A131 and the proposed Stour Valley West Cable Sealing End Compound, west of Alhamstone
- Additional land incorporated into the order limits (maximum area of land required for construction and operation of the proposed reinforcement) to accommodate the maximum swing of conductors (wires) on existing 400 kV transmission overhead lines, and
- Other minor changes to the order limits for construction and operational activities including access.

Consultation

A plan(s) of our latest proposals, as they now relate to your property, are enclosed with this letter. Plans can be requested digitally to allow maps to be zoomed using the contact details at the top of this letter. Further general information on the project and copies of our previous consultation materials can be found on our website: nationalgrid.com/bramford-twinstead.

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any response you wish to send to us. Details of how you can respond are outlined below.

If you have instructed a land agent to act on your behalf, we have also written to your land agent enclosing a copy of this letter.

What you need to do now

You will have until **23.59 on 29 March 2023** to submit any feedback you may have.

Feedback may be submitted in the following ways:

- Email us at contact@bramford-twinstead.nationalgrid.com
- Write to FREEPOST B TO T REINFORCEMENT

You do not need to repeat comments that you submitted at a previous consultation unless you wish to do so. We will consider all comments received relating to our proposals. There will also be a further opportunity for you to give your views on our proposals once our application has been submitted, directly to the Planning Inspectorate when our application is examined.

If you have any questions about this letter or the enclosures, please call our lands team on 01452 889000 or email: bramford-twinstead@brutonknowles.co.uk.

Thank you for your attention to this matter, and we look forward to hearing from you soon.

Yours sincerely/faithfully

John Bevan
Senior Project Manager
Bramford to Twinstead Reinforcement
National Grid Electricity Transmission Plc

L2.2: Section 42(1)(d) Letter to PILs who had not Previously been Consulted

IMPORTANT: THIS COMMUNICATION AFFECTS YOUR PROPERTY

Dear Name

01 March 2023

Bramford to Twinstead Reinforcement

Consultation Notice under Sections 42 and 44 of the Planning Act 2008

National Grid Electricity Transmission plc (here on referred to as National Grid) intends to submit an application for an order granting development consent to reinforce the transmission network between the existing Bramford Substation in Suffolk, and Twinstead Tee in Essex. This would be achieved by the construction and operation of a new 400 kilovolt (kV) electricity transmission line over a distance of approximately 29 km.

The project meets the threshold as a Nationally Significant Infrastructure Project (NSIP), as defined under Part 3 of the Planning Act 2008 ("the Act"), hence National Grid requires a development consent order (DCO).

Our proposals

The reinforcement would comprise up to 18 km of overhead line (consisting of approximately 50 new pylons, and conductors) and 11 km of underground cable system (consisting of up to 21 cables with associated joint bays and above ground link pillars).

Four Cable Sealing End (CSE) Compounds would be required to facilitate the transition between the overhead and underground cable technology. The CSE would be within a fenced compound, and contain electrical equipment, support structures, a small control building and a permanent access track.

It is proposed that approximately 27 km of existing overhead line and associated pylons would be removed as part of the proposals. This would comprise 25 km of existing 132 kV overhead line between Burstall Bridge and Twinstead Tee, and 2 km of the existing 400 kV overhead line to the south of Twinstead Tee. To facilitate the overhead line removal, a new grid supply point (GSP) substation is required at Butler's

Wood, east of Wickham St Paul, in Essex. The GSP substation would include associated works, including replacement pylons, a single circuit sealing end compound and underground cables to connect the substation into the existing 400 kV and 132 kV networks.

Other ancillary activities would be required to facilitate construction and operation of the project. These would include modifications to sections of the existing 400 kV overhead line, temporary working areas, diversion of third-party assets, land drainage from the construction and operational footprint, and land required for mitigation and Biodiversity Net Gain.

Consultation

We are contacting you, in accordance with Sections 42 and 44 of the Act, because we believe that you have an interest in land that may be affected by these proposals.

A plan(s) of our latest proposals, as they relate to your property, can be found enclosed with this letter. Plans can be requested digitally to allow maps to be zoomed using the contact details at the top of this letter. Further general information on the project and copies of our consultation materials can be found on our website: nationalgrid.com/bramford-twinstead.

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any response you wish to send to us. Details of how you can respond are outlined below.

If you have instructed a land agent to act on your behalf, we have also written to your land agent enclosing a copy of this letter.

What you need to do now

You will have until **23.59 on 30 March 2023** to submit any feedback you may have.

Feedback may be submitted in the following ways:

- Email us at contact@bramford-twinstead.nationalgrid.com
- Write to FREEPOST B TO T REINFORCEMENT

We will consider all comments received relating to our proposals. There will also be a further opportunity for you to give your views on our proposals, once our application has been submitted, directly to the Planning Inspectorate when our application is examined later this year.

If you have any questions about this letter or the enclosures, please call our lands team on 01452 889000 or email: bramford-twinstead@brutonknowles.co.uk.

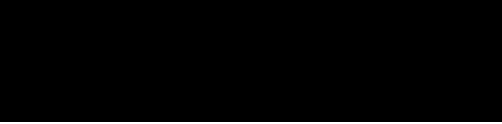

Thank you for your attention to this matter, and we look forward to hearing from you soon.

APPENDIX L3: Locations of Notices on Site (March 2023)

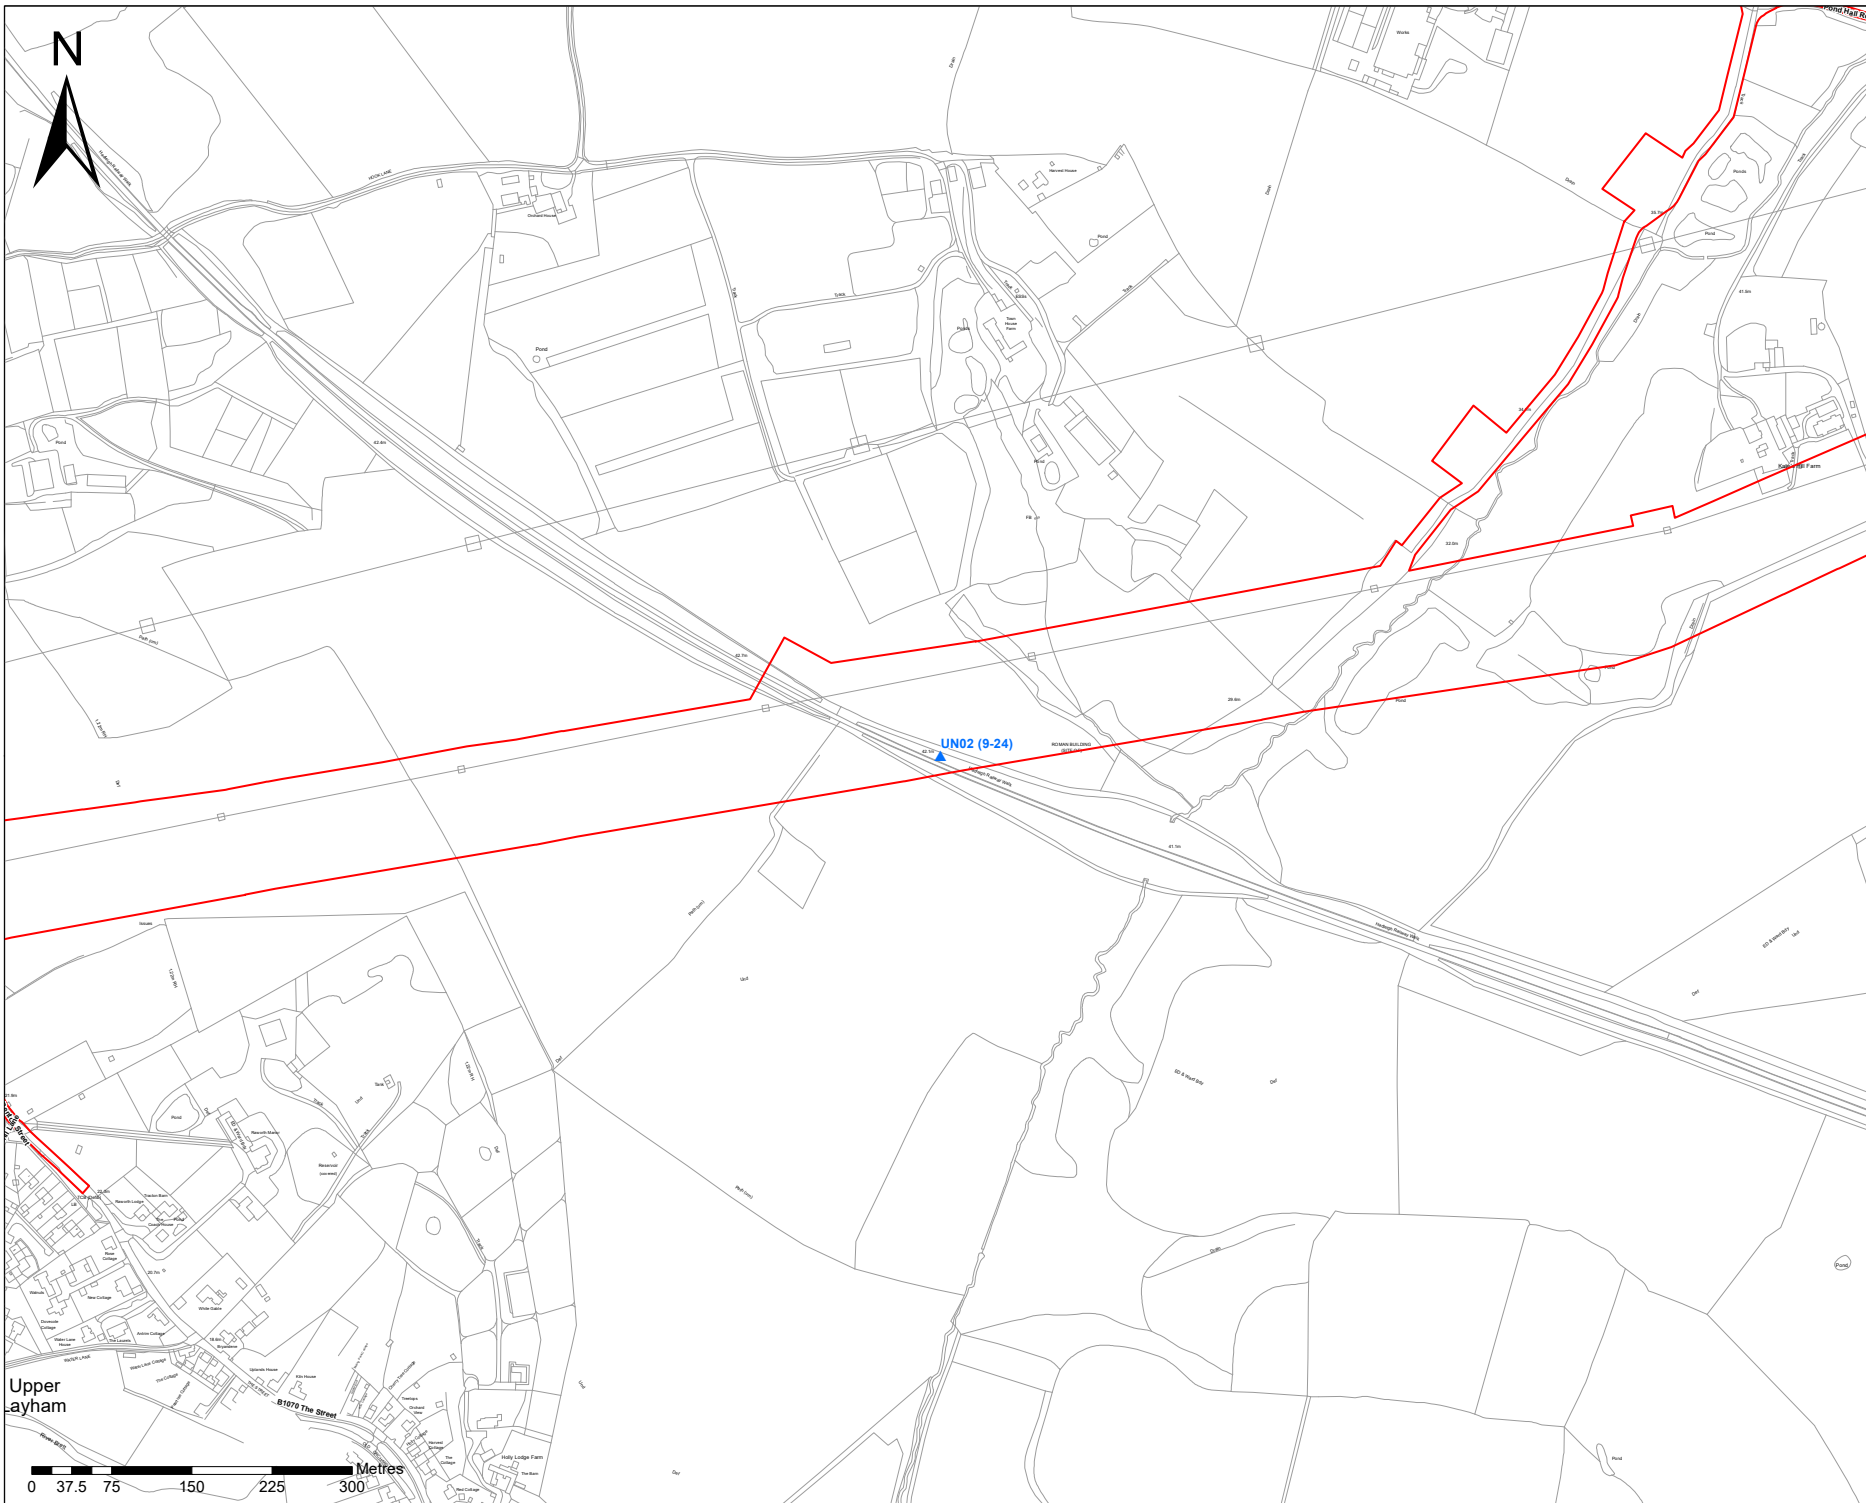

Location of Notices on Site (Additional consultation and engagement)

This appendix shows the locations of notices placed on site; each location is given a unique value from UN01 - UN08.

Numbers UN01 - UN08 were notices placed on or near a land parcel with an unknown interest and are summarised in the table below.

For the additional consultation, no S48 notices were placed on site.

Notice	Associated Plot(s)	Nature
UN01	n/a	Freehold
UN02	9-24	Freehold
UN03	21-51	Freehold
UN04	19-02	Occupier
UN05	21-34	Freehold
UN06	n/a	Freehold
UN07	22-04	Freehold
UN08	20-15	Freehold

IMPORTANT: THIS COMMUNICATION AFFECTS YOUR PROPERTY

Dear Name

14 April 2023

Bramford to Tinstead Reinforcement

Application for Development Consent

We have recently become aware that you may own, occupy or have a legal interest in land that could be affected by National Grid Electricity Transmission plc's ("National Grid") proposed Bramford to Tinstead Reinforcement Project (the "Project"). This may be because you have recently bought, leased or secured an interest in land which may be affected by the Project. As such, you may not have received a letter from National Grid informing you of previous statutory consultations for the Project and explaining how you can provide comments on the Project.

National Grid intends to submit an application for an order granting development consent to reinforce the transmission network between the existing Bramford Substation in Suffolk, and Tinstead Tee in Essex. This would be achieved by the construction and operation of a new 400 kilovolt (kV) electricity transmission line over a distance of approximately 29 km.

The project meets the threshold as a Nationally Significant Infrastructure Project (NSIP), as defined under Part 3 of the Planning Act 2008 ("the Act"), hence National Grid requires a development consent order (DCO).

Our proposals

The reinforcement would comprise up to 18 km of overhead line (consisting of approximately 50 new pylons, and conductors) and 11 km of underground cable system (consisting of up to 21 cables with associated joint bays and above ground link pillars).

Four Cable Sealing End (CSE) Compounds would be required to facilitate the transition between the overhead and underground cable technology. The CSE would

be within a fenced compound, and contain electrical equipment, support structures, a small control building and a permanent access track.

It is proposed that approximately 27 km of existing overhead line and associated pylons would be removed as part of the proposals. This would comprise 25 km of existing 132 kV overhead line between Burstall Bridge and Twinstead Tee, and 2 km of the existing 400 kV overhead line to the south of Twinstead Tee. To facilitate the overhead line removal, a new grid supply point (GSP) substation is required at Butler's Wood, east of Wickham St Paul, in Essex. The GSP substation would include associated works, including replacement pylons, a single circuit sealing end compound and underground cables to connect the substation into the existing 400 kV and 132 kV networks.

Other ancillary activities would be required to facilitate construction and operation of the project. These would include modifications to sections of the existing 400 kV overhead line, temporary working areas, diversion of third-party assets, land drainage from the construction and operational footprint, and land required for mitigation and Biodiversity Net Gain. Further details on the Project can be found on our Project website at: [REDACTED]

Although the period to respond to the consultation for the Project has now passed, you will still have the opportunity to register your interest to participate in the examination of the application for development consent once the application is made. National Grid intends to submit the application for development consent to the Planning Inspectorate in April 2023. Should the Planning Inspectorate accept the application for examination, we will send to you a letter explaining how to register your interest to participate in the examination and make representations (giving notice of your interest in, or comments in respect of National Grid's application for the Project).

If you have any questions about this letter, please call our lands team on 01452 889000 or email: bramford-twinstead@brutonknowles.co.uk.

Yours sincerely,

[REDACTED]

John Bevan
