APPENDIX F3: Section 42(1)(a) and (b) Letter

19 January 2022

Dear Sir/Madam,

Bramford to Twinstead Reinforcement

Statutory consultation under section 42 of the Planning Act 2008 and the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 (the APFP Regulations)

Notification under Regulation 13 of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (the EIA Regulations)

National Grid Electricity Transmission plc (NGET) will launch a statutory consultation in accordance with sections 42 and 47 of the Planning Act 2008 (the Act) for its Bramford to Twinstead reinforcement on 25 January 2022.

NGET proposes to reinforce the electricity transmission network between the existing Bramford Substation in Suffolk, and Twinstead Tee in Essex. This would be achieved by the construction and operation of a new 400 kilovolt (kV) electricity transmission line over a distance of approximately 29 km.

The reinforcement would comprise approximately 19 km of overhead line (consisting of approximately 55 new pylons and conductors) and 10 km of underground cable system (consisting of 20 cables with associated joint bays and above ground link pillars).

Four cable sealing end compounds would be required to facilitate the transition between the overhead and underground cable technology.

It is proposed that approximately 27.5 km of existing overhead line and associated pylons would be removed as part of the proposals (25 km of existing 132 kV overhead line between Burstall Bridge and Twinstead Tee, and 2.5 km of the existing 400 kV overhead line to the south of Twinstead Tee). To facilitate the overhead line removal, a new grid supply point substation is required at Butler's Wood, east of Wickham St Paul, in Essex.

Two options are proposed for the new 400 kV overhead line in the vicinity of Hintlesham Woods. Option 1 would utilise the alignment and pylons of the existing 400kV overhead line through the woods, whilst the existing 400kV overhead line would be re-routed to the north and west of Hintlesham Woods. Option 2 would parallel the existing 400kV overhead line to the south, with pylons located outside of the woodland and the conductors crossing the woods.

The project is a Nationally Significant Infrastructure Project (NSIP) under the Act. NGET is therefore required to submit an application for development consent to the Secretary of State for Business, the Energy and Industrial Strategy. The development consent being

sought will include a number of other provisions, including those which authorise the compulsory acquisition of land and rights over land, if necessary, to construct and maintain the Project.

We are contacting you because you are a prescribed consultee under section 42(1) of the Act and in accordance with Schedule 1 of the the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009. This is therefore a formal notice that we are holding a statutory consultation under the Act.

In advance of our application for development consent, this consultation is required under sections 42 and 47 of the Act. Concurrent with the section 42 consultation, we are undertaking consultation with the public pursuant to section 47 and in accordance with a Statement of Community Consultation, notice of the publication of which has been published in local and national newspapers.

We are also consulting on the potential environmental effects of the proposals. This information is detailed in the Preliminary Environmental Information Report (PEIR). An Environmental Statement will be produced subsequently in accordance with the Environmental Impact Assessment regulations and will accompany the application for development consent.

The Bramford to Twinstead reinforcement is an “EIA development” for the purposes of the EIA Regulations. Regulation 13 requires NGET to send your organisation a copy of the notice which is being published in accordance with Section 48 of the Act, and this is enclosed, together with a project newsletter.

Responding to the consultation

The consultation is running until 23:59 on 21 March 2022. A consultation response form is enclosed.

Documents which provide further details of this consultation and our proposals can be viewed online at [REDACTED]

We are also holding a series of webinars, appointment only ‘ask the experts’ sessions and telephone appointments to enable you to find out more about the proposals and ask any questions.

Reference copies of the Statement of Community Consultation and all other consultation materials will also be available to view free of charge from 25 January 2022 for the duration of the consultation at the following locations in the vicinity of the project:

We will review our proposals in light of the feedback we receive as part of this consultation and will consider if changes are needed to further reduce the effects on communities and the local area, before we make our application for development consent.

We may be required to make copies of representations available to the Secretary of State. Personal details will be held securely in accordance with the applicable data laws and will be used solely in connection with the consultation process and the development of this project and, except as noted above, will not be disclosed to any third parties.

If you have any questions, please don't hesitate to get in touch with us.

Yours faithfully,

John Bevan
Senior Project Manager
