1. Introduction

1.1 Overview

1.1.1 National Grid Electricity Transmission plc (here on referred to as National Grid) is making an application for development consent to reinforce the transmission network between Bramford Substation in Suffolk, and Twinstead Tee in Essex. The Bramford to Twinstead Reinforcement ('the project') would be achieved by the construction and operation of a new electricity transmission line over a distance of approximately 29km (18 miles), the majority of which would follow the general alignment of the existing overhead line network.

1.1.2 This historic environment gazetteer has been produced to support the Environmental Statement (ES) Chapter 8: Historic Environment (**application document 6.2.8**) which supports the application for development consent under the Planning Act 2008.

1.2 Methodology

1.2.1 The gazetteer is based on data from the following sources:

- Historic Environment Record (HER): data was purchased from Essex and Suffolk County Council in August 2022;
- The National Heritage List for England (NHLE) developed and maintained by Historic England for listed building and conservation area information (September 2022);
- Site inspection (June 2022) and online Streetview images (September 2022) used for historic lanes in Suffolk;
- Data on Protected Lanes (Essex County Council (ECC), 2013);
- Bramford to Twinstead: Aerial Investigation and Mapping Report (ECC, 2021b);
- Geophysical survey; and
- Archaeological trial trench (ATT) excavation.

- 1.2.2 This gazetteer is divided into three types of historic environment asset type:
- Archaeological remains (Chapter 2) – this includes designated scheduled monuments and non-designated assets (assets in the county HER) and additional data derived from an aerial interpretation and mapping exercise (AIM), geophysical survey and archaeological trial trenching (ATT);
 - Historic buildings and other structures (summarised as ‘built heritage’) (Chapter 3) – this includes standing structures such as listed buildings (Grades I, II* and II), conservation areas and non-designated historic structures; and
 - Historic landscapes (Chapter 4) – this includes designated assets (registered historic parks and gardens, important hedgerows and Protected Lanes in Essex), non-designated formal parkland and formal gardens, and the Historic Landscape Character Areas based on the HER datasets.
- 1.2.3 The designation data was acquired based on the Order Limits plus a 3km buffer extending outwards from those lines at the time of sourcing. This area encompasses all of the study area required for the Order Limits at application. In terms of non-designated assets, a 250m study area projecting outwards from the Order Limits has been used as sufficient to show the project in its archaeological context. Furthermore, the non-designated archaeological resource constitutes buried archaeology where setting is of less concern than it is for built heritage or designated parks and gardens as they are not visually appreciated assets.
- 1.2.4 In summary, the study areas used are:
- Archaeological remains:
 - Scheduled monuments – 3km; and
 - Non-designated archaeological assets – 250m;
 - Built heritage assets:
 - Listed buildings – 3km; and
 - Conservation areas – 3km;
 - Historic landscapes:
 - Registered historic parks and gardens – 3km;
 - Non-designated historic parks and gardens – 250m;

- Protected Lanes – 3km;
- Historic lanes (not designated) – 250m; and
- Historic landscape character units – 1km.

1.3 Notes to Support the Following Tables

- 1.3.1 All designated heritage assets are identified by their unique ID as provided by the NHLE, for example 112273. Non-designated heritage assets are referred by the unique ID provided by the Essex and Suffolk HER where available. Essex HER data has a MEX prefix (for 'monuments of Essex') and Suffolk data has a MSF prefix (for 'monuments of Suffolk') for archaeological monuments. The Essex historic landscape character (HLC) data has a 'HEX' prefix for their numbering system. The Suffolk HLC use a name category for their HLC units.
- 1.3.2 Cropmarks have been identified through Aerial Investigation and Mapping which are associated with records within the HER. Protected Lanes have been referred to by the Lane ID provided by Braintree District Council.
- 1.3.3 Heritage asset identified only through the Aerial Investigation and Mapping (AIM) are referred to with the Site ID provided in the reports (such as AIM Site C1, AIM Site 1) (ECC, 2012; ECC 2021). Where no ID was provided within the reports, a unique numerical identifier preceded by 'AIM' has been created e.g. AIM 01, AIM 02, etc. Heritage assets identified only through geophysical survey have been identified with the unique field and feature numbers provided in the report (Bartlett-Clark Consultancy, 2013) (e.g. geophysical survey anomaly 1A, geophysical survey anomaly1B, etc.). These identifiers have been maintained to allow for cross-referencing to the original documents.
- 1.3.4 The assets in the following tables can be found on the relevant figures along with the unique ID (**application document 6.4**):
- Figure 8.1: Archaeological Assets – Designated and Non-designated;
 - Figure 8.2: Built Heritage Assets – Designated and Non-designated; and
 - Figure 8.3: Historic Landscape Character Units.

2. Archaeological Remains

2.1 Scheduled Monuments

2.1.1 Table 2.1 lists the scheduled monuments within 3km of the Order Limits, which are all assigned a **high** value for sensitivity. The approximate distances from the Order Limits are given. These are shown on ES Figure 8.1: Archaeological Assets (**application document 6.4**) along with the NHLE ID.

Table 2.1 – Scheduled Monuments Within 3km of the Order Limits

NHLE ID	Name	Distance from Order Limits
1019537	Moated site at The Old Rectory, 150m north-east of Malting Farm	2.9km
1019889	Moated site at Moat Farm, 450m south of Cobbler's Corner	20m
1003759	Wenham Castle (Little Wenham Hall)	2.7km
1019815	Moated site and remains of demolished parts of Shelley Hall, a post-medieval great house	2km
1461329	Bronze Age/Early Iron Age barrows identified by crop marks, Aldham Mill Hill (Hadleigh)	2.3km
1006067	Toppesfield Bridge, Hadleigh	1.3km
1010501	Circular cropmark at Ferriers Farm, 190m south-west of Hill Farm	1.5km
1011807	Roman villa south of Alphamstone church	500m
1019664	Remains of church and churchyard, 80m south-east of The Ryes	800m
1011476	Stanley Hall moated site	1.8km
1011806	Roman villa 480m south-east of Hill Farm	1.2km

2.2 Non-designated Archaeological Remains

2.2.1 Table 2.2 lists the non-designated archaeological remains within the Order Limits and within 250m outside them and their sensitivity value. The sensitivity value has been assigned to non-designated assets based on the description set out in Table 1.1 in ES Appendix 5.4: Assessment Criteria (**application document 6.3.5.4**) and are assigned per asset in a table column. These are shown on ES Figure 8.1: Archaeological Assets (**application document 6.4**) along with the reference.

AIM Site 9	EARTHWORKS	N/A	Earthworks of a possible irregular enclosure or platform of unknown date within College Grove woods. The ditch is incomplete.	Low	0-250m
AIM Site 8	EARTHWORKS	N/A	These earthworks comprise the cropmarks of a large circular enclosure that has been truncated by a modern road, immediately east of AIM Site 7. The AIM report (ECC, 2021b) notes that, ' <i>The positioning of a circular enclosure in proximity to both a possible round barrow and mortuary enclosure suggests it could be contemporary and is very similar to examples in Essex such as Rivenhall and Feering</i> '.	High	Within
AIM Site 10	EARTHWORKS	N/A	Earthworks of a possible incomplete enclosure within Ramsey Wood. The enclosure has an internal bank, but neither the ditch nor bank are visible on the north-east side, although it appears to be cut by a modern boundary. An earthwork ditch with a low-level bank is attached to the north-west corner of the enclosure. Elsewhere in the wood is a sinuous boundary bank and ditch which is broken by modern boundaries, so it is assumed this earthwork is earlier in date.	Low	0-250m
AIM Site 5	CROPMARK	N/A	Cropmarks of an enclosure of a possible prehistoric date that has been truncated by a modern road was mapped during the 2012 project, additional field boundaries, that are marked on the 1st edition OS mapping of the 1880s were mapped in 2021 in the vicinity of the enclosure. AIM Site 13	EARTHWORKS	N/A	Earthworks of an undated small sub-square moat. The Suffolk HER suggests the moat “surrounds a small square island with possible central square unroofed building shown on 1880s OS map together with square (fish?) pond immediately to south”, however this island cannot be identified on either the lidar or aerial photographs (possibly due to tree cover). The site is part of Overbury Hall complex which, in the medieval period, was a sub-manor of Layham (absorbed by main manor in 1577). The Suffolk HER also states that the moat is not marked on the Tithe map, merely two rectangular ponds which suggests either the Tithe mapping is incorrect, or moat and structure were constructed between 1839 and 1880s. 3. Built Heritage Assets

3.1 Conservation Areas

3.1.1 Conservation area information has been acquired from the relevant planning authority for a study area 3km from the Order Limits. These have been reproduced in Table 3.1 and are shown on ES Figure 8.2: Built Heritage Assets (**application document 6.4**).

Table 3.1 – Conservation Areas

Name	Assigned Asset Value	Distance from Order Limits
Hadleigh	Medium	250m-1km

3.2 Listed Buildings

3.2.1 Listed building data was acquired for the Order Limits and a 3km study area around these. The 3km study area was chosen as a sufficiently large enough area to capture buildings potentially affect through changes to setting. The listed buildings are listed in Table 3.2 and shown on ES Figure 8.2: Built Heritage Assets (**application document 6.4**) along with their NHLE ID. The table identifies their value and an approximate distance from the Order Limits to give an approximate idea as to the asset's proximity to the project without

having to cross refer to the figures. The asset names (often with locational summaries) in Table 3.2 are reproduced verbatim as from the Historic England data and do not always conform with the style present throughout this document.

3.2.2 There is only one listed building within the Order Limits, Gatepiers, Gates and Railings To Hintlesham Hall (1036916) which is Grade II listed. The Open Source data from the NHLE (Historic England, 2022), records Abbott’s Farmhouse (NHLE ID 1122866) inside the Order Limits at National Grid Reference (NGR) 586994, 234783. A site visit has shown that this is marked in the incorrect location in the Open Source data and is correctly located at NGR586885, 234854, outside of the Order Limits. Figure 8.2: Built Heritage Assets (**application document 6.4**) shows the listed building in the correct location as recorded during the site visit.

4. Historic Landscapes

4.1 Introduction

4.1.1 The elements of the historic landscape resource comprise designated registered parks and gardens, designated Protected Lanes (Essex only), historic landscape characterisation (HLC) which is a broad characterisation exercise based on historic mapping and surviving historic character elements such as hedgerows, banks and ditches. The important hedgerows (including those with heritage features) are listed in ES Appendix 7.5: Important Hedgerow Assessment (**application document 6.3.7.5**) and are not duplicated here.

4.2 Historic Parks and Gardens

4.2.1 Registered historic parks and gardens were provided by the NHLE for a 3km study area. Non-designated historic parks and gardens were included for a smaller 250m study area. Both are listed in Table 4.1 and shown on ES Figure 8.3: Historic Landscape Character Units (**application document 6.4**).

Non-designated Historic Parks and Gardens (250m study area)				
MSF11949	N/A	Hintlesham Park (around Hintlesham Hall) – historic parkland around Hintlesham Hall, part of which remains. The parkland dates to the 16th century with later changes. Some elements of the former parkland survive, such as ornamental earthworks and the remnants of tree-lined avenues. The asset has been degraded through partial reversion to arable use and the partial loss of the tree-lined avenues. This has resulted in severance and erosion of the original character. 4.3 Historic Lanes and Protected Lanes

4.3.1 Protected Lanes are designated within Braintree District Council’s Local Plan (2022) and therefore only lie within Braintree District at the western end of the study area. The data has been gathered up to 3km study area around the Order Limits. The historic lanes in Suffolk are not designated and therefore a 250m study area around the Order Limits has been used for these. Both data sets are reproduced in Table 4.2 and are shown on ES Figure 8.3: Historic Landscape Character Units (**application document 6.4**).

4.4 Historic Landscape Character Units (Suffolk)

4.4.1 The historic landscape character (HLC) units in Suffolk have been identified for up to 1km around the Order Limits to provide context to the landscape within which they are set. The HLC are not given a reference number by Suffolk and are shown on ES Figure 8.3: Historic Landscape Character Units (**application document 6.4**). These have been grouped by type in Table 4.3 to provide a summary of the HLC within the study area.

4.5 Historic Landscape Character Units (Essex)

4.5.1 The historic landscape character (HLC) units in Essex have been identified for up to 1km around the Order Limits to provide context to the landscape within which they are set. These have been given a HLC reference number by Essex, as listed in Table 4.4 and are shown on ES Figure 8.3: Historic Landscape Character Units (**application document 6.4**).
