26 August 2015

Dear Sirs,

Re: Application by MANWEB for an Order Granting Development Consent for the North Wales Wind Farms Connection

Further to your letter of 04 August 2015 addressed to Tir Mostyn Wind and Foel Goch Limited (TMFGL) your ref EN020014 (our allocated ref NWWFC-AFP081). We are the owner of Tir Mostyn and Foel Goch wind farm, and wish to make the following observation with regard to the referenced MANWEB application.

Document ref '2.2.0 Overall Location Plan and Master Key Plan for Land Plans' illustrates a 132kV Overhead Electricity Line (OHL) crossing over a public highway at approximate National Grid Reference 301230, 359197. Our concern relates to ensuring that adequate clearance is maintained beneath the conductors of the OHL sufficient to facilitate the uninterrupted passage of (inter alia) vehicles, plant, machinery and turbine components along that public highway as required for the ongoing operation and maintenance (and the subsequent decommissioning) of Tir Mostyn and Foel Goch Wind Farm.

In the event that such assurance re the provision of uninterrupted access to Tir Gwynt cannot be given, then consideration might be given by the applicant to installing that part of the 132kV Overhead Electricity conduit as an underground cable as opposed to an overhead line.

In addition it should be noted that part of the route for the OHL in the immediate vicinity of the above road crossing point crosses over, in or under land in which TMFGL have an interest. We would therefore appreciate your continued inclusion of TMFGL in future correspondence on this particular matter as well as the wider issues relating to the overall application itself. It is our intent to send a representative along to the site visits as currently scheduled for 22 September in the event that you wish to seek any further clarification on the matters raised.

Yours sincerely

Barbara Saller
Director

For and on behalf of Tir Mostyn and Foel Goch Limited
