Dear Dr Harrison,

I am sending a request for a specific location along the wind farm connection route to be inspected as part of the Planning inspectorate's site visits. The location under question is a descending deep valley/dingle which anchors ancient woodland. Due to the natural terrain of this location and the potential mass felling of trees if the proposal was given the go-ahead, I believe this site warrants a visit by the panel. I am the owner of the location under question; however I am available to accompany the panel on the dates set out for their visits.

Yours faithfully

David Roberts
