To: North Wales Wind Farm Connection
Subject: FAO Steffan Jones- Re Our Client: Mr JE Davies [REDACTED] - Proposed North Wales Wind Farms Connection Scheme Our Ref: NWW.DAV.J-1-EW

Dear Sir,

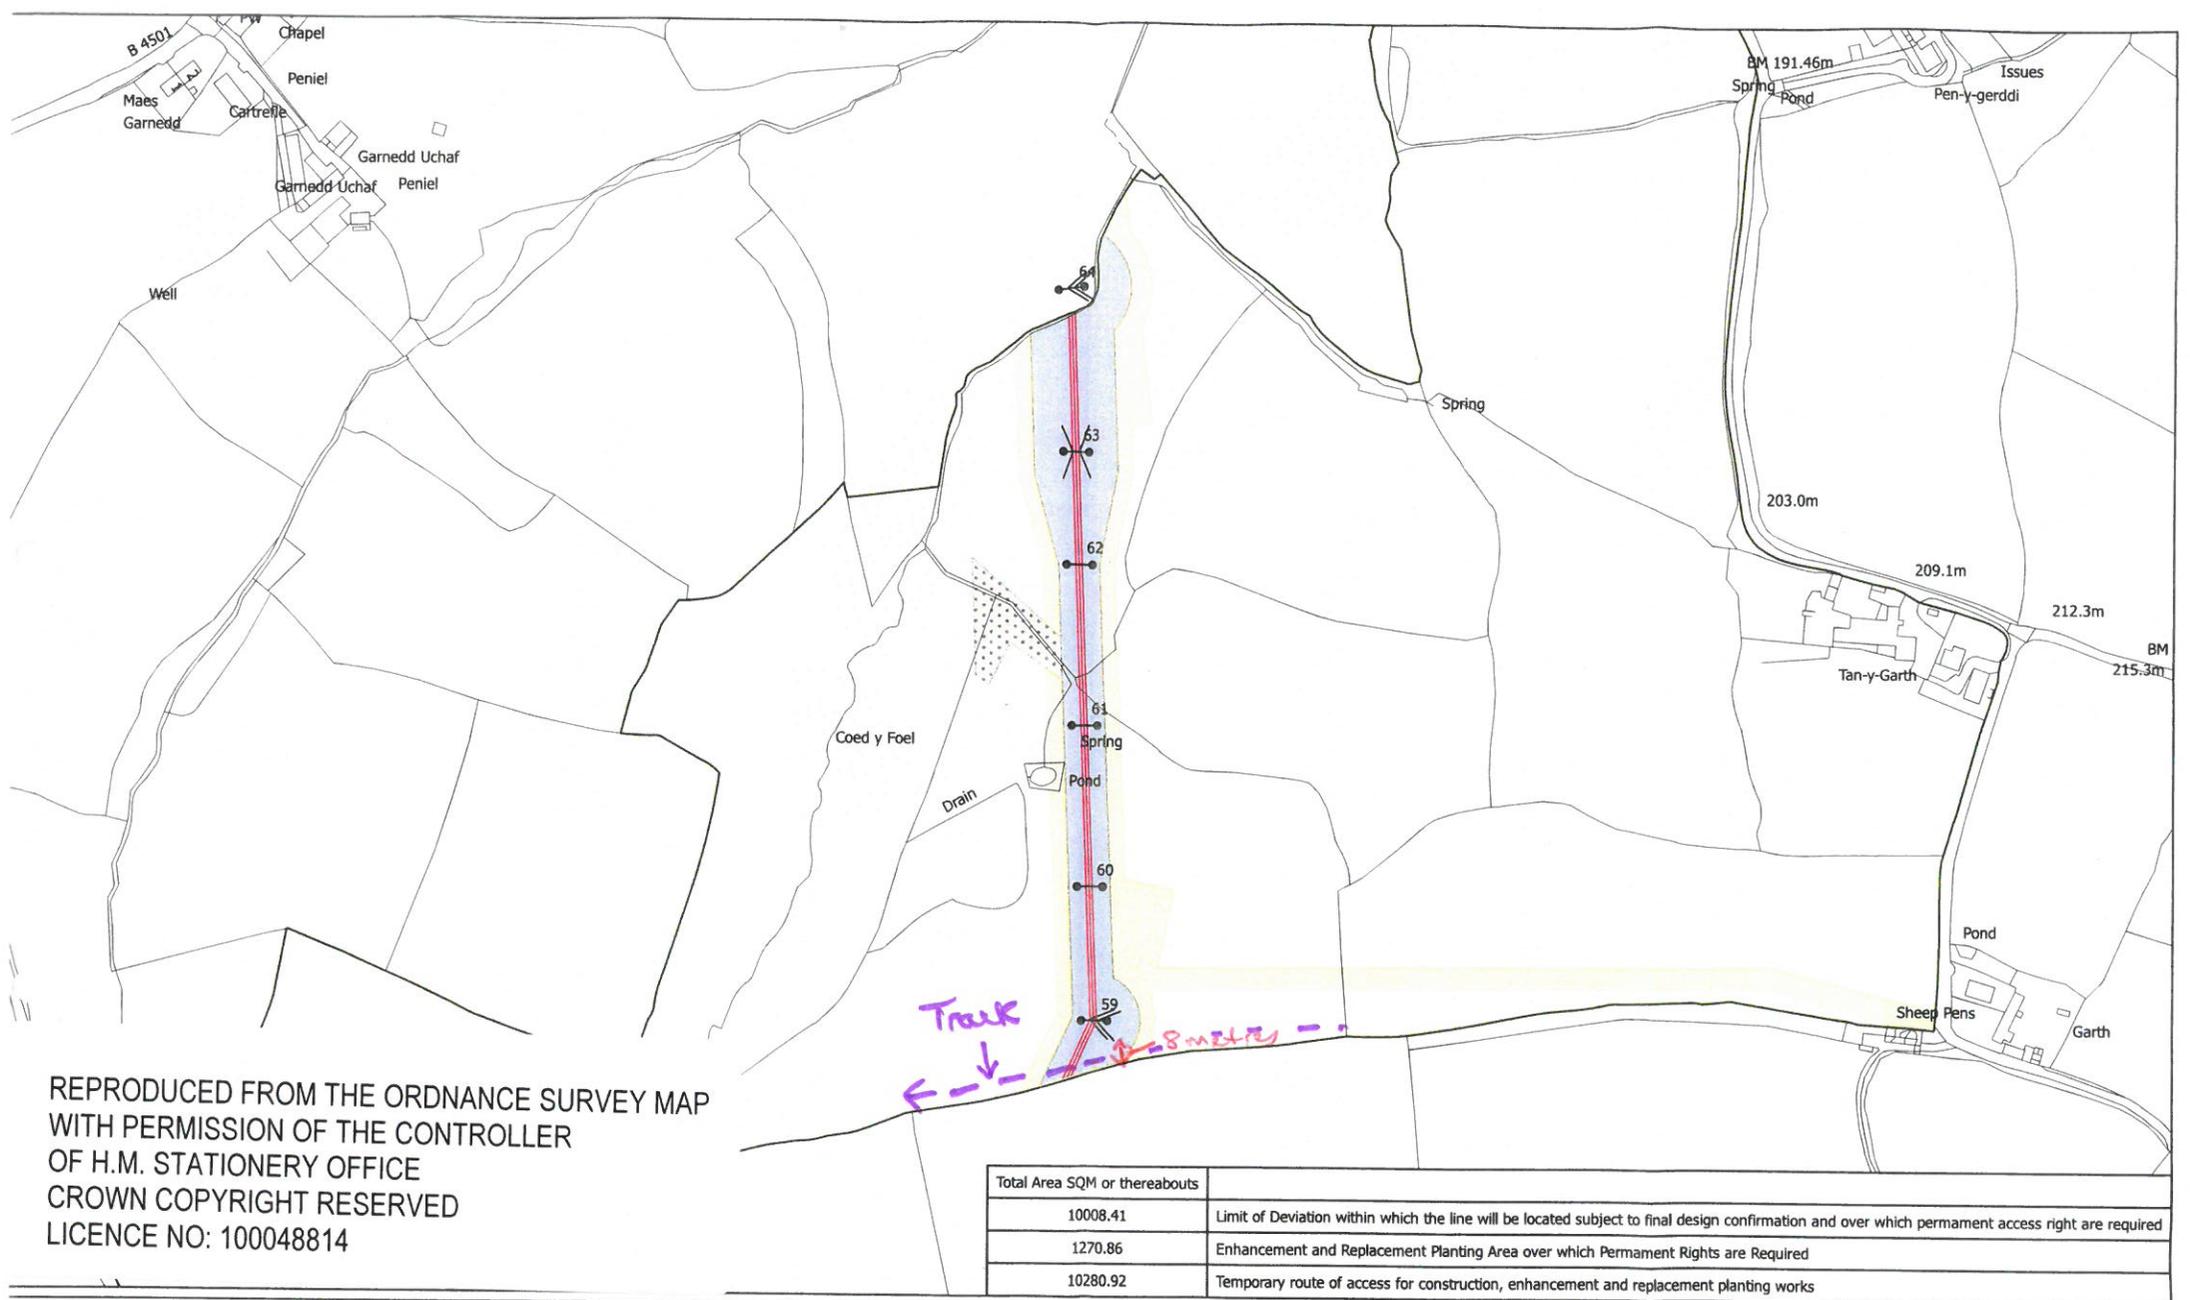

Further to our telephone conversation of earlier today , in respect of Scottish Power's Option A proposal, we confirm that our above mentioned client has asked that we request the Planning Inspectorate ,please, to visit the subject affected land in his ownership so as to be in a position to comprehend the request made for the following modification to the scheme proposal -:

In the event of it not being feasible to underground the proposed scheme apparatus ,for poles 59 and stays to be sited 8 meters away from the neighbouring field boundary (so that it does not impact on , and impede, the existing field track which is sited on a level plateaux leading between adjoining parcels).This is very significant as the rest of the field is sloping and the existing track traverses in a strategic position (being the only suitable " level" part with the parcel) . We understand that the revised proposal put forward by Scottish Power in respect of Poles 59 (as indicated on the attached plan) would meet our clients requirements in this respect (but we are conscious that this does not form part of the current application for the Planning Inspectorate's consideration).

To confirm inspection arrangements (which we understand are scheduled either on Tuesday 22nd or Wednesday 23rd September 2015) Mr Davies can be contacted on [REDACTED] .
We ask that the contact numbers ,please, are retained confidentially.

Yours faithfully ,
Eifion Bibby
