**Subject:** North Wales Wind Farms Connections - statement to Infrastructure Planning

Dear Case Officer,

I am writing to endorse the written representations made by the following Interested Parties in relation to the "North Wales Wind Farms Connections" National Infrastructure Planning Examination. The application is to construct pylons to connect wind farms on Denbigh Moor to the grid at St Asaph. Much of the route is in my constituency of the Vale of Clwyd. Many of the objections, which I have summarised below, centre on adverse visual impact and effects on the historic environment, tourism, business and property. The area is particularly sensitive in terms of the landscape and both Denbighshire County Council and Conwy County Council have passed motions requesting undergrounding of the cables.

Ramblers Association – visual impact  
Denbighshire County Council – tourism impact  
Nantglyn Community Council – visual impact  
Trefnant Community Council – request for undergrounding  
Cefn Meiriadog & Glascoed Road Residents Group – visual impact  
Campaign for the Protection of Rural Wales – visual impact  
Cefn Meiriadog Community Council – visual impact  
Llanynys Community Council – request undergrounding  
Pylon the Pressure Group – visual impact, heritage impact, tourism impact  
Llanfair Dyffryn Clwyd Community Council – visual impact  
Henllan Community Council – visual impact  
Derwen Community Council – visual impact  
Clocaenog Community Council – adverse effects on historic environment, tourism and business  
Cyffyllog Community Council – impact on property value  
Llanrhaeadr Community Council – undergrounding requested due to visual impact, historic environment, tourism impact, socio-economic impact, property value.  
Llanefydd Community Council – visual impact  
Llansannan Community Council – visual impact

In addition to this e-mail I am also sending a hard copy letter by post,

Yours faithfully,

Dr James Davies MP  
Vale of Clwyd Constituency
