Subject: North Wales W/Farm connections ENO20014

Dear Sir/Madam,

I am an interested party for the above and note the recent publication of a letter on the web site following closure of the inquiry and dated 23rd May 2016.

In relation to heading number 4. Consideration of in combination effects etc. I wish to make the following point.

It is my understanding that no HRA was considered for the in combination effect of Brenig and Clocaenog .

This is of concern as Natural Resources Wales raised the issue in relation to the grid connection and Clocaenog during that inquiry.

As the three developments are inextricably linked surely this cannot be right?

Thank you for giving my concerns your attention as I understand the question was directed to the applicant.

Sheila Harman.

Interested Party ENO20014.

2nd June 2016.

Sheila Harman
