

APPENDIX C: EXAMINATION LIBRARY

This Examination Library relates to the North Wales Wind Farms Connection (NWWFC) application. The library lists each document that was submitted to the examination by any party and documents that were issued by the Planning Inspectorate.

All documents listed are published on the National Infrastructure's Planning website and a hyperlink is provided for each document.

A reference is given to each document; these references are used within the Report on the Implications for European Sites and in the Examining Authority's (ExA) Recommendation Report. The documents within the library are categorised either by document type or by the deadline at which they were submitted.

Please note the following:

- Advice under section 51 of the Planning Act 2008 (as amended) (PA2008) that has been issued by the Inspectorate, is published to the National Infrastructure Website but is not included within the Examination Library as such advice is not an examination document.
- This document contains references to documents from the point the application was submitted.
- The order of documents within each sub-section is either chronological, numerical, or alphabetical and confers no priority or higher status on those that have been listed first.
