Dear Katherine.

I wish to write once more to voice my concerns at the lack of correspondence received by WPD about the issues regarding the "H poles" you have proposed to locate directly in front of my existing turbine. Contrary to my request for transparency regarding the detrimental effect this will have on my turbine's wind harvesting ability, I have received no further communication with WPD. I also have numerous concerns with the lack of modification to the new proposed "HOT'S". With this consideration I have difficulty in signing the HOT in its present form.

Yours

Gareth Thomas
