Subject: Personal - Brechfa Forest Connection - Information supplied by HV & KI Miles

Dear Mr Broderick and Mrs King

For today's deadline, and in the absence at this time of clarification to the contrary, we believe that the current proposal - whilst burying wires between poles 43 and 44 (which may or may not remove the need for these poles as notified at the Hearing on 10th February 2016) - still leaves the landscape surveyed from our property, very much a '*wire-scape*', with 2 lines crossing our farm. The undertaking to bury the 11kv line is not acknowledged in the 'updated landowner engagement table' which is disappointing.

For the record the nearest wire is 370m from our property, and as you appreciate, these wires will be very visible as our property has been designed to overlook the Gwili Valley and the alignment of the current proposal will dominate the eye and the landscape, as it very much follows the profile of the valley. Consequently, we still believe that there is a very long way to go to ensure our considerations as a landowner are really being taken into account. Over coming weeks, as I stated at the Hearing, we will endeavour to make every effort to discuss these issues with WPD.

In the meantime, please confirm receipt of this email as a log of our on-going concerns, and, our representation into future proceedings as appropriate.

Yours faithfully

Karen Miles
