Dear PINS

Please find attached our response to ExA's first round questions for deadline 1.

From the 1st April 2015 the statutory advice functions of the Historic Buildings and Monuments Commission for England are now carried out under the name 'Historic England' rather than 'English Heritage'.

Yours
Tim Allen

ExA's First Written Questions, Historic England Response.

AH 1.7 Outline Onshore Historic Environment WSI

Para 8.6 of Volume 3: Chapter 8 of the Environmental Statement [APP-049] states that the Outline Onshore Historic Environment WSI [APP-111] has been agreed with consultees as a suitable programme of works.

To All

Confirm, or otherwise your agreement with the Outline Written Scheme of Investigation for Onshore Archaeology [APP-111] as a suitable programme of works.

Note: This question may be answered in a Statement of Common Ground or Local Impact Report. If so, reference to section in which the response is found.

From the 1st April 2015 the statutory advice functions of the Historic Buildings and Monuments Commission for England are now carried out under the name 'Historic England' rather than 'English Heritage'.

Please note that Historic England operates an access to information policy.

Correspondence or information which you send us may therefore become publicly available.

The above question is answered within a statement of common ground which we understand has been submitted by the applicant as Appendix 20 of their response to Deadline 1.

The full document reference is:-

Triton Knoll Offshore Wind Farm Limited, Triton Knoll Electrical System, Appendix 20: Statement of Common Ground between Triton Knoll Offshore Wind Farm Limited and Historic Buildings and Monuments Commission for England,
Date: October 2015.

The relevant paragraphs of the above document, in answer to question AH 1.7 are as follows:-

Terrestrial Historic Environment

4.4 It is agreed that the Outline Onshore Written Scheme of Investigation (WSI), Appendix B (document reference. 8.11) provides a suitable prescription for the final onshore archaeological WSI that is required to be submitted and signed off pre-construction by the relevant authority under the draft DCO (document reference 3.1).

4.5 It is agreed that the Outline Onshore WSI describes suitable measures for further archaeological work to be detailed through a final and agreed WSI, in order to ensure appropriate mitigation pre-construction, during construction and post construction including archaeological investigation, assessment, recording, archive and dissemination.

4.6 With respect to mitigation measures, it is agreed that the embedded mitigation measures are suitable for minimising potential impacts to the historic environment as a result of the construction, operation and decommissioning of the project. In addition, it is agreed that the Outline Onshore WSI is a structured approach to ensuring potential historic environment impacts are mitigated.

4.7 It is agreed that the Applicant's approach to establishing the historic environment baseline to inform the impact assessment without undertaking geophysical survey and trial trenching pre-application, when combined with the implementation of measures set out in the Outline WSI (document reference 8.11) is a structured substitute approach to ensuring potential historic environment impacts are appropriately mitigated.

We remain at your service in the examination of these matters.

Yours sincerely

Tim Allen
