

Sir,

Re:- Meeting held at The Store House on Friday 13th November 2015 with the Planning Inspectorate about Triton Knoll cable line.

I apologise to you and the hearing for not being absolutely sure of the facts and causing you to stop me from making it into a pantomime.

The statement I made about 2 R.W.E. reps calling and my wife giving them my phone number to contact me, which they have not done still stands.

The discussion with the "Banham family" was with my brother Mark, his wife Jane and children Ginny and Joe at Frithville Village Hall in the early stages of this project. R.W.E. will tell you the date.

It was a public meeting to show the proposed cable route. Mark looked at where it was proposed to go through our grass field. In the field there is a 20 metre high wind turbine with 3 two meter blades standing on a 5m x 5m concrete base, their response was "We didn't know that was there we will have to alter the route. I don't consider that discussion or negotiation with the Banham family but, Mark doing their leg work

Yours sincerely

C.G. Banham
