GLOSSARY

1989 Act	The Electricity Act 1989
2009 Regulations	The Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009
Act	The Planning Act 2008
Convention	The European Convention on Human Rights
Development Consent Order (DCO)	An order made by the relevant Secretary of State granting development consent following the submission of an application made pursuant to section 37 of the Planning Act 2008 for a NSIP
draft Order	The draft DCO submitted by SP Manweb as part of the application for development consent for the Proposed Development
Engineering Recommendation P2/6	The electricity distribution network planning standard
Examining Authority	The person or persons appointed by the Secretary of State to carry out the examination of the application for the Proposed Development
Final Route Alignment	Indicative pole positions along the centre line of the Order Limits identified following consultation, technical and environmental appraisal
Guidance	Guidance entitled "Guidance related" to procedures for the compulsory acquisition of land issued by the Department for Communities and Local Government pursuant to the Planning Act dated September 2013
Nationally Significant Infrastructure Project (NSIP)	A project designated under the Planning Act 2008
NPS EN-1	The Overarching National Policy Statement for Energy published in July 2011
Order Land	The land required for or affected by the Proposed Development as in included within the Order Limits
Order Limits	The limits shown on the Works Plans within which the Proposed Development may be carried out
Overhead Line	The 132kV overhead line from the Terminal Pole at Long Wood near Oswestry (SJ 31132 29877) to the SP Manweb Substation at Wem
Proposed Development	The development for which an application for an order granting development consent is being made
PRoW	Public Right of Way which is a footpath or track over which the public have a right of access

Secretary of State	The Secretary of State for Business, Energy and Industrial Strategy
SP Manweb	The Distribution Network Operator for Cheshire, Merseyside, North Wales and Shropshire and the promoter of the Proposed Development
Statutory Compensation Code	The statutory provisions providing for the payment of compensation as set out in the Compulsory Purchase Act 1965 and the Land Compensation Act 1973
Statutory consultees	Organisation that SP Manweb is required to consult by virtue of the Planning Act 2008
Statutory undertakers	Companies with regulatory powers and duties, such as gas, electricity water and transport providers/ transmitters
Underground Cables	The 132kV underground cable from SP Manweb's Substation at Oswestry to the Terminal Pole at Long Wood near Oswestry (SJ 31132 29877)

1 INTRODUCTION

1.1 THE PROPOSED DEVELOPMENT

1.1.1 This Statement relates to an application by SP Manweb under the Act for the Reinforcement to the North Shropshire Electricity Distribution Network DCO. The DCO for the Proposed Development would grant powers to construct, install, operate and maintain approximately 21.3km of 132kV overhead line and approximately 1.2km of 132kV underground cable from Oswestry substation to Wem substation and integral works that form part of the Overhead Line and the Underground Cable, such as works within the substations, underground diversion of lower voltage lines, means of access, temporary construction compounds, scaffolds and lay down areas.

1.1.2 The draft Order (DCO Document 3.1) specifically authorises "associated development", being development that is associated with the Proposed Development. Schedule 1 of the draft Order describes all the development authorised by the draft Order.

1.1.3 SP Manweb has reviewed all of the works that comprise the Proposed Development and has identified those elements that it considers are associated development. The description of the Proposed Development in Schedule 1 of the draft Order includes miscellaneous associated development that supports the construction and operation of the principal development and is subordinate to that development, in accordance with the core principles set out in the Guidance and includes (but is not limited to) matters such as:

- the establishment of temporary laydown and storage areas;
- construction of temporary access tracks;
- welfare unit and security cabin;
- diversion of lower voltage overhead lines;

- drainage works and temporary culverts;
- works to alter the position of apparatus, including mains, sewers, drains and cables;
- works to alter the course of or otherwise interfere with a watercourse;
- establishment of cable pulley positions and the erection of scaffolding.

1.1.4 In some cases there may be some overlap between associated development and the works which form part of the NSIP SP Manweb considers that all elements of the Proposed Development either constitute part of an NSIP or are "associated development" within the meaning of section 115(2) of the Act and so can properly be authorised by the draft Order.

1.1.5 The Proposed Development will reinforce the local distribution network in this area, to provide capacity to support development on land allocated for new jobs and housing. The Proposed Development will provide support to the existing local distribution network by increasing capacity available in the North Shropshire area.

1.2 OSWESTRY SUBSTATION

1.2.1 The proposed new plant will be located within the existing substation boundary. The works include installing a 132kV outdoor circuit breaker, isolator and associated busbar, cable sealing ends and 132kV underground cable.

1.3 WEM SUBSTATION

1.3.1 The proposed new plant will be located within the existing substation boundary. The plant to be installed is a 132kV gantry, line isolator, associated busbars, a 132kV to 33kV transformer, 33kV cable to existing 33kV outdoor bay and a 33kV circuit breaker.

1.4 LOWER VOLTAGE DIVERSIONS

1.4.1 Where the Overhead Line crosses existing lower voltage (LV) overhead lines, there is a requirement to either erect scaffolding and cross over the existing LV line or permanently divert the existing LV line. Installation of scaffolding or removal of the existing LV lines is required to create a safe working corridor for construction of the Overhead Line. Furthermore, permanent diversion of a number of existing LV lines is proposed as, in their current position, they will infringe on the safety clearances of the Overhead Line. Further detail of the locations of these diversions for construction are provided on the Works Plans (DCO Documents 2.3.1 to 2.3.16).

1.5 CONFIRMATION OF COMPLIANCE WITH PLANNING ACT 2008

1.5.1 This Statement has been prepared in compliance with the requirements of Regulation 5(2)(h) of the 2009 Regulations and the Guidance.

1.5.2 This Statement forms part of a suite of documents accompanying the application for the DCO for the Proposed Development submitted in accordance with section 55 of the Act and regulation 5 of the 2009 Regulations and should be read alongside those documents. In particular SP Manweb has submitted the following documents relating to the compulsory acquisition powers sought as part of the Proposed Development:

- This Statement (DCO Document 4.1)
- Draft Development Consent Order (DCO Document 3.1)
- Explanatory Memorandum (DCO Document 3.2)
- Works Plans (DCO Documents 2.3.1 to 2.3.16)
- Land Plans (DCO Documents 2.2.1 to 2.2.16)
- Book of Reference (DCO Document 2.3)
- Funding Statement; (DCO Document 4.2)

1.6 THE ORDER LIMITS

- 1.6.1 The Order Limits set the limits within which the Proposed Development can be carried out. The Order Land is the land required for or affected by the Proposed Development. The Order Land is within the Order Limits.
- 1.6.2 The Order Limits include the land for constructing the new 132kV circuit (including works at the existing substations, the Overhead Line, the Underground Cable, six sections of undergrounding existing lower voltage lines, seven laydown areas and the construction accesses.
- 1.6.3 The width of the Order Limits (excluding the substations) is 25m wide for the Overhead Line and 20m wide for the Underground Cable. The Order Limits for this type of development are often in the region of 100m in width.
- 1.6.4 The Order Limits extends at changes in direction of the Overhead Line. The width of the Order Limits along some access tracks also extends to take account of vehicle swept path requirements. The Order Limits also extend at the terminal pole to allow the conductors to be fixed to the wood poles by means of a winch. The Order Limits also include construction accesses from public roads.
- 1.6.5 The development of the Order Limits has had the benefit of input from line design engineers who, working alongside the environmental team, have been able to balance the need between the technical requirements of a Trident overhead line and the avoidance of environmental constraints whilst considering issues raised through statutory and non-statutory consultations and landowner discussions.
- 1.6.6 Within the Order Limits the poles would, wherever possible, be located where indicated along the Final Route Alignment. The indicative pole locations are shown on the Environmental Statement Figures (DCO Document 6.14). However, it may be necessary and desirable to refine the final vertical and

horizontal profile of the conductors and pole positions (known as micro-siting) to reflect the following:

- The outcome of pre-construction surveys which identify new localised environmental constraints and ground investigations surveys; and
- Agreements on minor alterations suggested by landowners.

1.6.7 In response to any need for micro-siting and notwithstanding any constraints, micro-siting within the Order Limits allows for the following:

- To move any pole structure by up to 5m from its indicative position (as shown on the Works Plans (DCO Documents 2.3.0 - 2.3.16)), but not within 1m of the outside edge of any hedgerows; and
- To increase vertically in height any pole structure (not exceeding 2 metres) from the heights shown in the Proposed Pole Schedule (Appendix 3.1 to the Environmental Statement (DCO Document 6.3.1)).

1.6.8 The new rights and restrictions that SP Manweb is seeking to create are identified in the Book of Reference (DCO Document 4.3) and are described in detail at Section 5 of this Statement.

1.6.9 This Statement sets out the justification for seeking compulsory acquisition powers within the DCO for the Proposed Development and for seeking certain other powers within the DCO which may interfere with property rights and private interests. This Statement also explains why SP Manweb considers that there is a compelling case in the public interest for the inclusion of the compulsory acquisition and certain other powers within the DCO.

2 NEED FOR THE PROPOSED DEVELOPMENT

2.1 NATIONAL POLICY STATEMENT CONTEXT

2.1.1 Six National Policy Statements for energy infrastructure were designated by the Secretary of State for Energy and Climate Change in July 2011 (now the Secretary of State for Business, Energy and Industrial Strategy). NPS EN-1 sets out that it is critical that the UK continues to have secure and reliable supplies of electricity as part of the transition to a low carbon economy. NPS EN-1 also highlights an urgent need for new electricity transmission and distribution infrastructure to be provided.

2.1.2 Paragraphs 3.1.1 to 3.1.4 of NPS EN-1 state:

"The UK needs all the types of energy infrastructure covered by this NPS in order to achieve energy security at the same time as dramatically reducing greenhouse gas emissions.

It is for industry to propose new energy infrastructure projects within the strategic framework set by Government. The Government does not consider it appropriate for planning policy to set targets for or limits on different technologies.

The IPC should therefore assess all applications for development consent for the types of infrastructure covered by the energy NPSs on the basis that the Government has demonstrated that there is a need for those types of infrastructure and that the scale and urgency of that need is as described for each of them in this Part.

The IPC should give substantial weight to the contribution which projects would make towards satisfying this need when considering applications for development consent under the Planning Act 2008."

2.1.3 Paragraph 3.7.2 of NPS EN-1 states:

"it is likely that demand for electricity will increase significantly over the coming decades. Factors contributing to such growth include the development of new housing and business premises (the number of households in England is projected to grow to 27.8 million by 2031) and the increased use of electricity in domestic and industrial heat and transport. Lack of sufficiently robust electricity networks can cause, or contribute to, large scale interruptions. Existing transmission and distribution networks will have to evolve and adapt in various ways to handle increases in demand, but construction of new lines of 132Kv and above will also be needed to meet the significant national need for expansion and reinforcement of the UK's transmission and distribution networks".

2.2 STATUTORY DUTIES AND LICENCE REQUIREMENTS

2.2.1 This section provides an overview of the electricity industry with reference to SP Manweb, its distribution network, regulatory regime and the price control mechanisms which SP Manweb has to operate within and the overarching statutory duties placed upon SP Manweb under the 1989 Act.

2.2.2 To distribute electricity within an area an operator is required to hold an electricity Distribution Licence. SP Manweb, as the holder of a Distribution Licence for the Cheshire, Merseyside, Shropshire, North and Mid Wales areas and, as the Distribution Network Operator (DNO) for these areas, must comply with various statutory duties and obligations including:

- Under section 9 of the 1989 Act to develop and maintain an efficient, co-ordinated and economical system of electricity distribution;
- Under schedule 9 of the 1989 Act, when formulating proposals for the installation of an electric line and other works to:

- have regard to the desirability of preserving natural beauty, of conserving flora, fauna and geological or physiographical features of special interest and of protecting sites, buildings and objects of architectural, historic or archeological interest; and
- do what it reasonably can to mitigate any effect which the proposals would have on the natural beauty of the countryside or on any such flora, fauna, features, sites, buildings or objects

2.2.3 Distribution Licences are granted subject to various standard conditions. SP Manweb must adhere to these licence conditions so as to demonstrate compliance with the various design and operational standards placed upon it for the design and operation of its distribution network.

2.2.4 These standards and conditions play a fundamental part of SP Manweb's approach in the design and provision of any additions to the distribution network, and have formed an integral part when considering the Proposed Development. Such conditions further serve to ensure that SP Manweb complies with the necessary responsibilities placed upon it as a licence holder.

2.2.5 Conditions of its Distribution Licence are such that SP Manweb has a responsibility placed upon it to plan and develop the distribution system in accordance with a standard not less than that set out in ER P2/6. ER P2/6 is considered to be the minimum level of security standard which sets out the expected levels of security required for distribution networks.

2.2.6 Reinforcement of the distribution network in North Shropshire is necessary in order to establish the required level of network security for the Legacy - Newtown - Oswestry - Welshpool - Whitchurch 33kV demand group.

2.3 DESCRIPTION OF THE EXISTING NETWORK IN SHROPSHIRE

- 2.3.1 The SP Manweb distribution network consists of 132kV, 33kV, 11kV and lower voltage overhead lines and underground cables. More detailed reference to the electrical network connectivity can be found within the Further Updated Strategic Options Report (DCO Document 7.7). Reference to this will aid understanding of the area of interest.
- 2.3.2 Electricity is supplied to this area of network from the National Grid transmission interface at Legacy GSP substation, then through 132kV network to 132/33kV transformers at BSPs located in substations located at Legacy, Newtown, Oswestry, Welshpool and Whitchurch. The design of the SP Manweb distribution network means that BSPs are interconnected through the 33kV network and these substations are operated as a group.
- 2.3.3 The 33kV network operates fully interconnected within the network group, and is coupled to adjacent 33kV network groups at Marchwiel via long overhead lines and at Legacy through a 33kV reactor located in Legacy substation.

2.4 NEED FOR PROPOSED REINFORCEMENT

- 2.4.1 SP Manweb has been in discussion with Shropshire Council for many years in relation to the need for reinforcement of the electricity circuit in North Shropshire. In preparing its business plans for the current regulatory period (RIIO-ED1), this area of network was identified and recognised as requiring reinforcement. SP Manweb has been working closely with Shropshire Council to understand the level of expected development and the land allocated for new jobs and homes, particularly in and around Oswestry, Whitchurch, Wem and Ellesmere.
- 2.4.2 Reinforcement of the distribution network in North Shropshire is necessary in order to establish the required level of network security for the Legacy - Newtown - Oswestry - Welshpool - Whitchurch 33kV demand group.

- 2.4.3 The 33kV network in the Whitchurch/Wem area is presently operating near thermal and voltage limits for a 132kV circuit or 132/33kV transformer outage at Whitchurch during winter maximum demand conditions. The 33kV group is therefore supplying close to its maximum capacity. It is becoming problematic to accommodate additional demand in this area and this network would be unable to accommodate the level of demand growth indicated by Shropshire Council.
- 2.4.4 Failure to reinforce the group would impede or prevent economic growth in the area. Failure to reinforce the group could also risk thermal overloads and voltage issues as demand is expected to continue to increase for the group. This would pose a risk to the security of supply to thousands of the 62,250 customers supplied by this group.
- 2.4.5 Furthermore, failure to reinforce the network would lead to a non-compliance of ER P2/6 and breach of Condition 24 of SP Manweb's distribution licence, which can ultimately result in financial penalties as SP Manweb has a statutory duty to comply with conditions attached to its distribution licence.
- 2.4.6 To accommodate sustained demand growth in the area, reinforcement to the local distribution network is therefore required.

2.5 STRATEGIC OPTIONS

- 2.5.1 The Further Updated Strategic Options Report (**DCO Document 7.7**) outlines the options which were assessed for the reinforcement to the network. The Further Updated Strategic Options Report (**DCO Document 7.7**) should be reviewed alongside this Statement in order to establish a greater detailed understanding of the options and alternatives to the Proposed Development.

2.5.2 Various aspects of the distribution network need to be considered when reviewing the need to reinforce the local distribution. These are explained further in the Further Updated Strategic Options Report (DCO Document 7.7) but include:

- Thermal conditions
- Fault levels
- Voltage levels
- Security of supply
- Losses
- Environmental Impact
- National Policy Statements

2.5.3 As stated earlier, SP Manweb has a statutory duty to develop and maintain an efficient, coordinated and economical system of electricity distribution under the 1989 Act.

2.5.4 The strategic options considered are described in detail in the Further Updated Strategic Options Report (**DCO Document 7.7**) and are summarised in Table 1 below;

Table 1		
Description	Additional Comments	Option Status Summary
Do Nothing	Does not reinforce the network	Option discounted because it would risk thermal overloads and voltage issues for the group and would ultimately lead to non-compliance of ER P2/6 and breach of Condition 24 of SP Manweb's distribution licence.

Table 1		
Description	Additional Comments	Option Status Summary
New 132kV overhead circuit Oswestry - Wem	Circa. 21km overhead line to reinforce the existing 33kV distribution network increasing capacity throughout Shropshire.	Minimises the electrical infrastructure required and therefore associated potential environmental effects.
New 132kV underground cable Oswestry - Wem	Circa. 27km underground cable to reinforce the existing 33Kv distribution network increasing capacity throughout Shropshire	Option discounted. Technically satisfactory, but not the lowest cost option.
New 33kV circuit Whitchurch- Wem	Install new circa. 13km 33kV wood pole line.	Option discounted. Unable to provide the level of capacity required and would ultimately lead to non-compliance of ER P2/6 and breach of Condition 24 of SP Manweb's distribution licence.
New 33kV circuit Oswestry - Wem	Install new circa. 21km 33kV wood pole line.	Option discounted. Unable to provide the level of capacity required and would ultimately lead to non-compliance of ER P2/6 and breach of Condition 24 of SP Manweb's distribution licence.
New 33kV Whitchurch - Wem and PST	Install new circa. 13km 33kV wood pole line and phase shifting transformer at Wem.	Option discounted. Technical/operational risk.
Voltage Up- ration of existing Oswestry - Wem 33kV	Conversion of 29km of 33kV to operate at 132kV.	Option discounted. Technical/operation risk, high cost and deliverability concerns.

Table 1		
Description	Additional Comments	Option Status Summary
New 132kV Marchwiell-Whitchurch; 132/33kV transformer; 33kV Whitchurch - Wem	Install circa.18km 132kV wood pole line from Marchwiell to Whitchurch and 132/33kV transformer in Whitchurch substation. Install circa.13km 33kV wood pole line Whitchurch to Wem.	Option discounted. Although technically satisfactory, this is not the least cost or environmental impact option.
New 132kV Crewe - Whitchurch; 132/33kV transformer; 33kV Whitchurch - Wem	Install circa.22km 132kV wood pole line from Crewe to Whitchurch and 132/33kV transformer in Whitchurch substation. Install circa.13km 33kV wood pole line Whitchurch to Wem	Option discounted. Would breach SP Manweb design policy due to operational risk (introducing power flows through 33kV circuits which cannot be accommodated by the existing network).
132kV Whitchurch - Wem; 132/33kV transformer in Wem	Install new circa. 13km 132kV wood pole line and transformer at Wem substation.	Option discounted. No suitable arrangements can be made at 132kV in the existing Whitchurch substation. Therefore not technically satisfactory.
132kV Marchwiell- Wem; 132/33kV transformer in Wem	Install new circa. 27km 132kV wood pole line and transformer at Wem substation.	Option discounted. Although technically satisfactory, is not the lowest cost or lowest environmental impact option.
132kV Legacy-Wem; 132/33 transformer in Wem	Install new circa. 31km 132kV wood pole line and transformer at Wem substation.	Option discounted. Although technically satisfactory, is not the lowest cost or lowest environmental impact option.
132kV Shrewsbury-Wem; 132/33kV	Install new circa. 19km 132kV wood pole line and transformer at Wem substation. (Shrewsbury is within	Option discounted. Would breach SP Manweb design policy and

Table 1		
Description	Additional Comments	Option Status Summary
transformer in Wem	WPD Midlands' licence area).	therefore not technically satisfactory.
New NGET substation between Legacy and Shrewsbury; 132kV GSP- Wem; 132/33kV transformer at Wem	New 400/132kV GSP substation at suitable location under the existing 400kV Legacy-Shrewsbury circuit. Install new 132kV wood pole line from new GSP to Wem and 132/33kV transformer at Wem.	Option discounted. Although technically satisfactory, this is a very high cost option.

2.6 PROPOSED REINFORCEMENT

2.6.1 Following the options assessment summarised in Table 1 above, a 132kV overhead line and underground cable between Oswestry and Wem is considered the best option to provide the most economical and efficient reinforcement of the distribution network.

2.6.2 Further details of the options considered and assessments can be found in the Further Updated Strategic Options Report (**DCO Document 7.7**).

2.7 CONCLUSIONS

2.7.1 The various options available to help increase the security of supply for the North Shropshire area were considered in the Further Updated Strategic Options Report (DCO Document 7.7), which found that out of all the options considered, a 132kV overhead line and underground cable between Oswestry and Wem is considered the most appropriate option to address the network issues and meet SP Manweb's statutory duty to maintain an economic and efficient system.

3 SCOPE OF COMPULSORY ACQUISITION

- 3.1.1 Article 18 of the draft Order gives SP Manweb the power to create and acquire the rights and impose the restrictions described in the Book of Reference (**DCO Document 4.3**), and shown on the Land Plans (**DCO Documents 2.2.1 to 2.2.16**). The creation of rights is required to enable SP Manweb to reinforce the network by constructing the Proposed Development.
- 3.1.2 As the Proposed Development principally comprises the construction, installation, operation and maintenance of 132kV overhead line and underground cable, all of the acquisition powers relate to the creation of new rights, the imposition of restrictions and the temporary use of land. SP Manweb will therefore not be acquiring ownership of any land. A description of the new rights and restrictions are set out in Section 5 of this Statement.
- 3.1.3 The land, which is subject to compulsory acquisition powers, and the land which is subject to powers of temporary use, is identified on the Land Plans (**DCO Documents 2.2.1 to 2.2.16**) and set out in the Book of Reference (**DCO Document 4.3**).
- 3.1.4 In order for the Overhead Line to connect into the existing substation at Oswestry, works are required at the substation which include an underground cable from the substation to Long Wood.
- 3.1.5 This Statement seeks to justify the inclusion of these powers in the draft Order for the Proposed Development. Parts 5 and 6 of the draft Order include the Articles that relate to compulsory acquisition or the interference with third party rights.

4 DESCRIPTION OF LAND SUBJECT TO COMPULSORY ACQUISITION AND OTHER POWERS

4.1 PHYSICAL DESCRIPTION OF THE ORDER LAND

4.1.1 The Order Land is shown on the Land Plans (DCO Document 2.2.1 to 2.2.16) and is referred to in the Book of Reference (DCO Document 4.3). The works, for which purpose the creation of new rights, imposition of restrictions and temporary use is required and necessary, are shown on the Works Plans (DCO Documents 2.3.1 to 2.3.16) and described in Schedule 1 to the draft Order.

Oswestry Substation

4.1.2 The existing substation is located on the north-eastern edge of Oswestry. The Proposed Development includes works at a currently vacant bay within the substation. The works include installing a 132kV outdoor circuit breaker, isolator and associated busbar, cable sealing ends and 132kV underground cable.

4.1.3 The proposed works at Oswestry Substation will use the existing and recently upgraded vehicular accesses into the substation site off of the B4580. Construction vehicles using this access will move through the substation site to the proposed works. No new or alteration works to these accesses is required.

Underground Cable

4.1.4 From Oswestry Substation a length of approximately 1.2km of 132kV underground cable will be laid to a terminal structure at Long Wood (grid ref SJ 3113229877). The route for the underground cable (as shown on the Works Plans (DCO Documents 2.3.0 - 2.3.16) runs parallel to the western edge of the A5(T) for a distance of approximately 900m before passing south-east under the A5(T). For the remaining 300m it heads south parallel to the eastern edge of the A5(T) then east towards Long Wood where it transfers to an overhead line terminal structure.

Overhead Line

- 4.1.5 The Overhead Line would commence at Long Wood (SJ 31132 29877), structure no. 1, and following a roughly east-west alignment between the eastern edge of Oswestry and the western edge of Wem.
- 4.1.6 From Long Wood, the overhead line (poles 1-16) would cross agricultural fields to the north of Middleton, before crossing the B5009 and the Shrewsbury to Chester rail line in quick succession (poles 17 and 18). Continuing east, the overhead line (poles 19-36) would pass through fields south of Babbinswood, before crossing the Montgomery Canal (poles 37 and 38) and passing through the northern edge of the Woodhouse Estate (poles 39-49). Continuing east, the overhead line (poles 50-64) would cross the River Perry at three locations as it skirts around Rednal Mill and passes north of Lower Lees.
- 4.1.7 The overhead line (poles 65-76) then would turn to pass through fields north of Lower Hordley at Dandyford Farm, before resuming a more south-easterly direction (poles 77-100) as it passes south of Top House Farm and Kenwick Lodge. To the northwest of Stanwardine-in-the-Wood, the overhead line (poles 101-115) would turn east and continue across the A528 south of Cockshutt. The overhead line (poles 116-138) would then skirt through fields north of Malt Kiln Farm, and south of Coppice Farm, passing to the south of Moorfields Local Wildlife Site, before heading northeast (poles 139-150) between Bentley Farm and The Shayes, which lie to the south of Loppington and northwest of Noneley.
- 4.1.8 North of the Shayes, the overhead line (poles 151-162) would turn to the east and pass north of Commonwood. It would then skirt southeast and then northeast as it crossed the River Roden (poles 163-166) before continuing in a north-easterly direction (poles 167-176) towards the B5476 and into Wem Substation.

Wem Substation

4.1.9 Wem Substation is located on the western edge of Wem. It is an existing substation that currently operates up to 33kV. No 132kV apparatus is currently installed.

4.1.10 The proposed new plant will be located within the existing substation boundary. The plant to be installed is a 132kV gantry, line isolator, associated busbars, a 132kV to 33kV transformer, 33kV cable to existing 33kV outdoor bay and a 33kV circuit breaker. The proposed layout of Wem Substation is shown on Figure 5.1 below.

Other Development

4.1.11 The Proposed Development also includes work to facilitate the new electrical circuit including;

- Undergrounding six short sections of existing SP Manweb lower voltage overhead lines in order to ensure safe electrical clearance for the new overhead line; and
- Temporary works required for the construction of the new overhead line including seven temporary laydown areas, welfare unit, security cabin, access tracks, vegetation clearance and reinstatement

4.1.12 The construction compound for the Proposed Development would be located at the existing SP Manweb depot at Maesbury Road, Oswestry Industrial Estate, where site offices and welfare facilities are already in place. As this is an existing depot this compound is not included within the draft DCO. The construction compound would cater for the following:

- Bulk delivery (HGV) and storage of materials, the main components being wood poles, wood baulks, conductor, stay wire, cross arm assemblies and insulators; and

- Storage of construction plant and equipment.

4.2 TEMPORARY RESTRICTION OF PUBLIC RIGHTS OF WAY

4.2.1 There are 39 PRoW running through the Order Limits. The Land Plans show the PROW that will be affected by the Proposed Development. Article 11 of the draft DCO grants all the necessary powers to temporarily restrict PRoW affected by the Proposed Development.

4.2.2 It is SP Manweb's intention to keep all PRoW open. This will be ensured via traffic and pedestrian marshalling. Schedule 3 of the draft Order identifies the PRoW anticipated to be affected. Access will be maintained but subject to traffic and pedestrian marshalling for safety reasons during the construction of the Proposed Development.

4.2.3 The Construction Report (DCO Document 7.2) describes how the PRoW will be managed to ensure they are safe to use and the disruption to the users are minimised.

4.3 STREETS AND TEMPORARY PROHIBITION AND RESTRICTION OF STREETS

4.3.1 SP Manweb is relying on Articles 9, 10 and 11 of the draft Order for the Proposed Development to provide general powers to enter onto streets, to construct means of access and to create temporary prohibitions and restrictions of the use of streets to carry out works.

4.3.2 It should be noted that in some instances, the right to create temporary access tracks extends beyond the construction of the Overhead Line and Underground Cable enable maintenance of the Overhead Line and Underground Cable albeit the access tracks themselves will only exist temporarily for the duration of the applicable works.

5 APPLICATION PURPOSE FOR WHICH THE POWERS ARE SOUGHT

5.1 PURPOSE FOR WHICH THE POWERS ARE SOUGHT

5.1.1 The purpose of the compulsory acquisition powers is to enable SP Manweb to construct and install, operate and maintain the Proposed Development. The need for the Proposed Development is set out in Section 3 of this Statement. A range of rights, and restrictions, are necessary for these purposes.

5.1.2 Compulsory acquisition powers can only be exercised over the land identified on the Land Plans.

5.1.3 Article 18 of the draft Order gives SP Manweb the power to create and acquire the rights and impose the restrictions described in the Book of Reference (DCO Document 4.3), and shown on the Land Plans. The creation of rights is required to enable SP Manweb to construct the Proposed Development.

5.1.4 Article 18 of the draft Order would authorise SP Manweb to create and acquire compulsorily the following rights and to impose the following restrictions:

- Class 1: rights for the installation, maintenance and use of the Overhead Line and the imposition of restrictions to protect the overhead line element of the Overhead Line;
- Class 2: rights for the installation, maintenance and use of the Underground Cable and the imposition of restrictions to protect the Underground Cable;
- Class 3: rights for the installation, maintenance and use of the lower voltage diversions element of the Proposed Development and the imposition of restrictions to protect the lower voltage diversions element of the Proposed Development;

- Class 4: rights to use and create the accesses of the Proposed Development and the imposition of restrictions to protect the accesses of the Proposed Development;
- Class 5: rights for reinstatement planting and drainage and the imposition of restrictions to protect the reinstatement planting and drainage;
- Class 6: temporary rights to use land as a temporary laydown area, to construct gates and fencing, construction working area, access for construction and the imposition of restrictions to protect these elements of the Proposed Development;
- Class 7: rights for the installation of substation equipment at Wem and Oswestry substations.

5.1.5 The justification for the creation and acquisition of rights and imposition of restrictions under Class 1 is demonstrated in Table 2 below:

Table 2 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 1		
Class 1	Explanation of Rights	Justification
a)	to install (and keep installed), erect, retain, use, inspect, and take all steps reasonably necessary to maintain, renew, remove and relocate (and to carry out all necessary reinstatement works in relation to) electricity poles, overhead electricity lines and all equipment and apparatus required (including but not limited to cable sealing ends, bird diverters and fibre optic cable) in connection with the North Shropshire Reinforcement Project;	This right is necessary to enable the 132kV overhead line to be installed, without which the Proposed Development could not be implemented. For the duration of the operational life of the 132kV overhead line, SP Manweb will be required to maintain and repair any outages. Accordingly, the right includes the right to renew and remove apparatus, including the relocation of apparatus, as may be necessary but only within the confines of the area of land subject to the right vested in SP Manweb.
b)	To construct, improve, widen, repair, maintain, renew, rebuild	In order to gain access to the route within which the 132kV

Table 2 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 1		
Class 1	Explanation of Rights	Justification
	and take all necessary support for (1) existing access and access tracks and (2) new temporary access and temporary access tracks and in respect of both (1) and (2) ancillary structures including bridges and other crossings together with all necessary decommissioning and reinstatement works and the right to erect temporary fencing in connection with the exercise of the Class 1 Rights;	overhead line is to be installed and subsequently maintained, access along the route (both longitudinally and latitudinally) will be required either through existing access arrangements or by the creation of new access arrangements. This right therefore provides the necessary powers to, for example, widen and repair existing accesses and tracks and create new temporary accesses and tracks.
c)	Of pedestrian and vehicular access and egress onto the land and from the land onto any adjacent land (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage caused in connection with the exercise of the Class 1 Rights;	Class 1b) provides for the creation of the accesses, whereas this Class 1c) provides for the use of such accesses.
d)	to construct, relocate and/or divert any drain, drainage ditch, culvert, pipe, cable, conduit and all ancillary structures together with the right of drainage into any drainage ditch or culvert and subsequently to retain, use, inspect, maintain, decorate, repair, bridge over, replace and renew as necessary any drain, drainage ditch, culvert, pipe, cable or conduit in connection with the exercise of the Class 1 Rights;	Given the nature of the land over which these Class 1 rights are being sought, there is a possibility that it may necessary to interfere with drains, drainage ditches, culverts, pipes, cables, conduits for the purposes of the installation, operation and maintenance of the 132kV overhead line. This right therefore enables SP Manweb to carry out such necessary works so as to ensure the 132kV overhead line

Table 2 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 1		
Class 1	Explanation of Rights	Justification
		can be installed unimpeded whilst also ensuring the continuing operation of the drains, for example.
e)	to fell, trim or lop trees and bushes and to clear and remove any and all vegetation (and the right to reinstate, replace, improve and maintain) which may obstruct or interfere with the exercise of the Class 1 Rights and the right to install any necessary ecological and/or landscaping measures in connection with the exercise of the Class 1 Rights;	Article 31 of the draft Order provides the power to fell or lop trees. This is to ensure that safe clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.
f)	To prevent any works on or uses of the land which may interfere with the exercise of the Class 1 Rights, in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, workings or land formations, tree, shrub or other plant or other thing whatsoever, the right to prevent or remove any works or uses which alter the surface level, ground cover or composition of the land;	This right is necessary to protect the unimpeded operation of the 132kV overhead line. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus.
g)	to carry out (and to carry out all necessary reinstatement works in relation thereto) archaeological, environmental, ecological, agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking of boreholes and/or excavation of	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and following vesting of the area of land subject to the right vested in SP Manweb.

Table 2 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 1		
Class 1	Explanation of Rights	Justification
	trial pits, and other like surveys and investigations and any pegging out works for purposes in connection with the exercise of the Class 1 Rights;	
h)	to make good any damage caused in connection with the exercise of the Class 1 Rights;	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to g).
i)	to take onto the land and use equipment required for winching and pulling and to erect any associated fencing required in connection with the exercise of the Class 1 Rights.	This right is necessary to enable the 132kV overhead line to be installed, without which the Proposed Development could not be implemented.
j)	to erect on the land and use scaffolding and/or associated fencing and/or netting and /or associated equipment required in connection with the in connection with the exercise of the Class 1 Rights	This right is necessary to enable the 132kV overhead line to be installed, without which the Proposed Development could not be implemented.

5.1.6 The justification for the creation and acquisition of rights and imposition of restrictions under Class 2 is demonstrated in Table 3 below:

Table 3 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 2		
Class 2	Explanation of Rights	Justification
a)	to install (and keep installed), retain, use, inspect, maintain (as defined in the North Shropshire Reinforcement Order), renew, remove and relocate (and to carry out all necessary decommissioning and	This right is necessary to enable the 132kV underground cable to be installed, without which the Proposed Development could not be implemented. For the duration of the operational life of the

Table 3 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 2		
Class 2	Explanation of Rights	Justification
	reinstatement works in relation to) underground electricity cables and all equipment and apparatus required in connection with the North Shropshire Reinforcement Project, including but not limited to, earth wires and fibre optic cables and the right to undertake ducting, boring, cabling and directional drilling;	132kV underground cable, SP Manweb will be required to maintain and repair any outages. Accordingly, the right includes the right to renew and remove apparatus, including the relocation of apparatus, as may be necessary but only within the confines of the area of land subject to the right vested in SP Manweb.
b)	to construct, improve, widen, repair, maintain, renew, rebuild and take all necessary support for (1) existing access and access tracks and (2) new temporary access and temporary access tracks and in respect of both (1) and (2) ancillary structures including bridges and other crossings together with all necessary decommissioning and reinstatement works in connection with the exercise of the Class 2 Rights;	In order to gain access to the route within which the 132kV underground cable to be installed and subsequently maintained, access along the route (both longitudinally and latitudinally) will be required either through existing access arrangements or by the creation of new access arrangements. This right therefore provides the necessary powers to, for example, widen and repair existing accesses and tracks and create new temporary tracks.
c)	of pedestrian and vehicular access and egress onto the land and from the land onto any adjacent land (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage caused in connection with the exercise of the Class 2 Rights;	Class 2b) provides for the creation of the accesses, whereas this Class 2c) provides for the use of such accesses.

Table 3 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 2

Class 2	Explanation of Rights	Justification
d)	to construct, relocate and/or divert any drain, drainage ditch, culvert, pipe, cable, conduit and all ancillary structures together with the right of drainage into any drainage ditch or culvert and subsequently to retain, use, inspect, maintain, decorate, repair, bridge over, replace and renew as necessary any drain, drainage ditch, culvert, pipe, cable or conduit in connection with the exercise of the Class 2 Rights;	Given the nature of the land over which these Class 2 rights are being sought, there is a possibility that it may necessary to interfere with drains, drainage ditches, culverts, pipes, cables, conduits for the purposes of the installation, operation and maintenance of the 132kV underground cable. This right therefore enables SP Manweb to carry out such necessary works so as to ensure the 132kV underground cable can be installed unimpeded whilst also ensuring the continuing operation of the drains, for example.
e)	to fell, trim or lop trees and bushes, and to clear and remove any and all vegetation (and the right to reinstate, replace, improve and maintain) which may obstruct or interfere with the exercise of the Class 2 Rights and the right to install any necessary ecological and/or landscaping measures in connection with the exercise of the Class 2 Rights;	Article 31 of the draft Order provides the power to fell or lop trees. This is to ensure that safe clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.
f)	To prevent any works on or uses of the land which may interfere with the exercise of the Class 2 Rights in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, workings or land formations, tree, shrub or other plant or other thing whatsoever, the right to prevent or remove any works	This right is necessary to protect the unimpeded operation of the 132kV underground cable. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus.

Table 3 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 2		
Class 2	Explanation of Rights	Justification
	or uses which alter the surface level, ground cover or composition of the land;	
g)	to carry out (and to carry out all necessary reinstatement works in relation thereto) archaeological, environmental, ecological, agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking of boreholes and/or excavation of trial pits, and other like surveys and investigations and pegging out works for purposes in connection with the exercise of the Class 2 Rights; and	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and following vesting of the area of land subject to the right vested in SP Manweb.
h)	to make good any damage caused in connection with the exercise of the Class 2 Rights.	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to g).

5.1.7 The justification for the creation and acquisition of rights and imposition of restrictions under Class 3 is demonstrated in Table 4 below:

Table 4 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 3		
Class 3	Explanation of Rights	Justification
a)	to inspect, remove and dismantle (and to carry out all necessary reinstatement and/or decommissioning works in relation to) electricity poles, overhead electricity lines and all equipment and apparatus	This right is necessary to ensure SP Manweb meet Energy Networks Association Technical Specification 43-8 Overhead Line Clearances recommends clearances between new power lines and

Table 4 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 3		
Class 3	Explanation of Rights	Justification
	forming part of the existing 33kV, 11kV, 415V and 240V network by the undertaker and/or those authorised by the undertaker in connection with the North Shropshire Reinforcement Project;	any existing utilities that may be affected. The stated minimum clearance from lowest conductor of the proposed 132kV overhead line to the existing lower voltage lines is 2.7m. Where this cannot be achieved, then the existing lower voltage line is to be placed underground.
b)	to install, keep installed, retain, use, inspect, maintain and renew underground electricity cables and all equipment and apparatus required in connection with the North Shropshire Reinforcement Project.	This right is necessary to ensure SP Manweb meet Energy Networks Association Technical Specification 43-8 Overhead Line Clearances recommends clearances between new power lines and any existing utilities that may be affected. The stated minimum clearance from lowest conductor of the proposed 132kV overhead line to the existing lower voltage lines is 2.7m. Where this cannot be achieved, then the existing lower voltage line is to be placed underground.
c)	to install, keep installed, retain, use, inspect, maintain and renew electricity poles, overhead electricity lines and all equipment and apparatus required in connection with the exercise of the Class 3 Rights.	Terminal poles will need to be installed at the point of undergrounding, this right is therefore necessary to carry out the underground diversions.
d)	to construct, improve, widen, repair, maintain, renew, rebuild and take all necessary support for (1) existing access and access tracks and (2) new temporary access and temporary access tracks and in respect of	In order to gain access to the route within which the lower voltage diversions are to be installed and subsequently maintained, access along the route (both longitudinally and latitudinally) will be required

Table 4 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 3		
Class 3	Explanation of Rights	Justification
	both (1) and (2) ancillary structures including bridges and other crossings together with all necessary decommissioning and reinstatement works in connection with the exercise of the Class 3 Rights;	either through existing access arrangements or by the creation of new access arrangements. This right therefore provides the necessary powers to, for example, widen and repair existing accesses and tracks and create new temporary access tracks.
e)	of pedestrian and vehicular access and egress onto the land and from the land onto any adjacent land (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage caused in connection with the exercise of the Class 3 Rights;	Class 3d) provides for the creation of the accesses, whereas this Class 3e) provides for the use of such accesses.
f)	to construct, relocate and/or divert any drain, drainage ditch, culvert, pipe, cable, conduit and all ancillary structures together with the right of drainage into any drainage ditch or culvert and subsequently to retain, use, inspect, maintain, decorate, repair, bridge over, replace and renew as necessary any drain, drainage ditch, culvert, pipe, cable or conduit in connection with the exercise of the Class 3 Rights;	Given the nature of the land over which these Class 3 rights are being sought, there is a possibility that it may necessary to interfere with drains, drainage ditches, culverts, pipes, cables, conduits for the purposes of the installation, operation and maintenance of the lower voltage diversions. This right therefore enables SP Manweb to carry out such necessary works so as to ensure the lower voltage diversions can be installed unimpeded whilst also ensuring the continuing operation of the drains, for example.

Table 4 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 3		
Class 3	Explanation of Rights	Justification
g)	to fell, trim or lop trees and bushes, and to clear and remove any and all vegetation (and the right to reinstate, replace, improve and maintain) which may obstruct or interfere with the exercise of these Class 3 Rights and the right to install any necessary ecological and/or landscaping measures in connection with the exercise of the Class 3 Rights;	Article 31 of the draft Order provides the power to fell or lop trees. This is to ensure that safe clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.
h)	To prevent any works on or uses of the land which may interfere with the exercise of the Class 3 Rights in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, workings or land formations, tree, shrub or other plant or other thing whatsoever, and the right to prevent or remove any works or uses which alter the surface level, ground cover or composition of the land;	This right is necessary to protect the unimpeded operation of the lower voltage diversions. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus.
i)	to carry out (and to carry out all necessary reinstatement works in relation thereto) archaeological, environmental, ecological, agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking of boreholes and/or excavation of trial pits, and other like surveys and investigations and pegging out works for purposes in	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and following vesting of the area of land subject to the right vested in SP Manweb.

Table 4 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 3		
Class 3	Explanation of Rights	Justification
	connection with the exercise of the Class 3 Rights; and	
j)	to make good any damage caused in connection with the exercise of the Class 3 Rights.	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to i).

5.1.8 The justification for the creation and acquisition of rights and imposition of restrictions under Class 4 is demonstrated in Table 5 below:

Table 5 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 4		
Class 4	Explanation of Rights	Justification
a)	to construct, improve, widen, repair, maintain, renew, rebuild access tracks and ancillary structures including gates, fences, bridges and other crossings, including rights to lay temporary road surfaces when necessary for the exercise of the Class 1 Rights, Class 2 Rights, Class 3 Rights, Class 5 Rights and Class 6 Rights and to take all necessary support for existing access tracks, together with all necessary decommissioning and reinstatement works;	In order to gain access to the route within which the accesses are to be installed and subsequently maintained, access along the route (both longitudinally and latitudinally) will be required either through existing access arrangements or by the creation of new access arrangements. This right therefore provides the necessary powers to, for example, widen and repair existing accesses and tracks and create new temporary accesses and tracks.
b)	of pedestrian and vehicular access and egress (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage	Class 4a) provides for the creation of the accesses, whereas this Class 4b) provides for the use of such accesses.

Table 5 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 4		
Class 4	Explanation of Rights	Justification
	caused in connection with the exercise of the Class 1 Rights , Class 2 Rights, Class 3 Rights, Class 5 Rights and Class 6 Rights;	
c)	to carry out (and to carry out all necessary reinstatement works in relation to) archaeological, environmental, ecological, agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking of boreholes and/or excavation of trial pits, and other like surveys and investigations for purposes in connection with the exercise of the Class 4 Rights;	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and following vesting of the area of land subject to the right vested in SP Manweb.
d)	to prevent any works on or uses of the land which may interfere with the exercise of the Class 4 Rights, in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, tree, shrub or other plant or other thing whatsoever, the right to prevent or remove any works or uses which alter the surface level, ground cover or composition of the land;	This right is necessary to protect the unimpeded access for the Proposed Development. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus
e)	to make good any damage caused in connection with the exercise of the Class 4 Rights; and	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to e).
f)	to fell, trim or lop trees and bushes, and to clear and remove	Article 31 of the draft Order provides the power to fell or lop

Table 5 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 4		
Class 4	Explanation of Rights	Justification
	any and all vegetation (and the right to reinstate, replace, improve and maintain) which may obstruct or interfere with the exercise of the Class 4 Rights and the right to install any necessary ecological and/or landscaping measures in connection with the exercise of the Class 4 Rights;	trees. This is to ensure that safe clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.

5.1.9 The justification for the creation and acquisition of rights and imposition of restrictions under Class 5 is demonstrated in Table 6 below:

Table 6 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 5		
Class 5	Explanation of Rights	Justification
a)	to construct, relocate and/or divert any drain, drainage ditch, culvert, pipe, cable, conduit and all ancillary structures together with the right of drainage into any drainage ditch or culvert and subsequently to retain, use, inspect, maintain, decorate, repair, replace and renew as necessary any drain, drainage ditch, culvert, pipe, cable or conduit in connection with the construction of the North Shropshire Reinforcement Project;	Given the nature of the land over which these Class 5 rights are being sought, there is a possibility that it may necessary to interfere with drains, drainage ditches, culverts, pipes, cables, conduits for the purposes of the reinstatement planting and reinstatement drainage. This right therefore enables SP Manweb to carry out such necessary works so as to ensure the reinstatement planting and reinstatement drainage can be installed unimpeded whilst also ensuring the continuing operation of the drains, for example.
b)	to fell, trim or lop trees and bushes, and to clear and remove any and all vegetation (and the	Article 31 of the draft Order provides the power to fell or lop trees. This is to ensure that safe

Table 6 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 5		
Class 5	Explanation of Rights	Justification
	right to reinstate, replace, improve and maintain) which may obstruct or interfere with the construction of the North Shropshire Reinforcement Project and the right to install any necessary ecological and/or landscaping measures including the planting of trees, shrubs and other vegetation in connection with the construction of the North Shropshire Reinforcement Project;	clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.
c)	to carry out (and to carry out all necessary reinstatement works in relation to) archaeological, environmental, ecological, agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking or boreholes and/or excavation of trial pits, and other like surveys and investigations for purposes in connection with the construction of the North Shropshire Reinforcement Project;	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and following vesting of the area of land subject to the right vested in SP Manweb.
d)	to prevent any works on or uses of the land which may interfere with the exercise of the Class 5 Rights, in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, tree, shrub or other plant or other thing whatsoever, the right to prevent or remove any works or uses which alter the surface level,	This right is necessary to protect the unimpeded access for the Proposed Development. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus.

Table 6 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 5		
Class 5	Explanation of Rights	Justification
	ground cover or composition of the land;	
e)	of pedestrian and vehicular access and egress on to the land and from the land on to any adjacent land (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damages caused in connection with the exercise of these Class 5 rights; and	The right is necessary to provide for the use of accesses.
f)	to make good any damage caused in connection with the exercise of the Class 5 Rights.	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to e).

5.1.10 The justification for the creation and acquisition of rights and imposition of restrictions under Class 6 is demonstrated in Table 7 below:

Table 7 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 6		
Class 6	Explanation of Rights	Justification
a)	to use as a temporary laydown area, storage area, working area and parking area for all plant, equipment, materials and vehicles required by the undertaker and/or those authorised by the undertaker in connection with the construction of the North Shropshire Reinforcement Project save that such rights will not extend to	To construct and install the Proposed Development, temporary laydown areas, storage areas, working areas and parking areas are required along the route within which the 132kV overhead line and underground cable is to be installed. No PROW will be affected by this right as is

Table 7 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 6		
Class 6	Explanation of Rights	Justification
	public rights of ways and existing private access tracks which are not temporarily closed under Schedule [6] of the [The Reinforcement to North Shropshire Reinforcement Electricity Distribution Network [Order]; 201[]];	expressly stated within the right itself.
b)	to construct and maintain temporary gates, fences and other boundary structures as may be necessary in connection with the exercise of the Classes 1 Rights , the Class 2 Rights, Class 3 Rights and the Class 6 Rights;	The right is necessary to provide access to the Proposed Development and to provide separation between the Proposed Development, members of the public and livestock.
c)	of pedestrian and vehicular access and egress on to the land and from the land onto any adjacent land (which shall include without limitation construction and maintenance traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage caused in connection with the exercise of the Class 6 Rights;	The right is necessary to provide for the use of accesses.
d)	to make good any damage caused in connection with the exercise of the Class 6 Rights;	This right provides the necessary land rights for SP Manweb to repair any damage caused by the carrying out of any or all of the above rights a) to d).
e)	of pedestrian and vehicular access and egress onto the land and from the land onto any adjacent land (which shall include without limitation construction and maintenance	The right is necessary to provide for the use of accesses

Table 7 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 6		
Class 6	Explanation of Rights	Justification
	traffic) and with plant, equipment and machinery in connection with the exercise of and the making good of any damage caused in connection with the exercise of the Class 3 Rights;	
f)	to construct, relocate and/or divert any drain, drainage ditch, culvert, pipe, cable, conduit and all ancillary structures together with the right of drainage into any drainage ditch or culvert and subsequently to retain, use, inspect, maintain, decorate, repair, replace and renew as necessary any drain, drainage ditch, culvert, pipe, cable or conduit in connection with the construction of the North Shropshire Reinforcement Project;	Given the nature of the land over which these Class 6 rights are being sought, there is a possibility that it may necessary to interfere with drains, drainage ditches, culverts, pipes, cables, conduits for the purposes of the carrying out the Proposed Development.
g)	to fell, trim or lop trees and bushes, and to clear and remove any and all vegetation (and the right to reinstate, replace, improve and maintain) which may obstruct or interfere with the construction of the North Shropshire Reinforcement Project and the right to install any necessary ecological and/or landscaping measures including the planting of trees, shrubs and other vegetation in connection with the construction of the North Shropshire Reinforcement Project;	Article 31 of the draft Order provides the power to fell or lop trees. This is to ensure that safe clearances to live electricity conductors are maintained. It is therefore necessary to provide the corresponding land rights to undertake the felling or lopping.
h)	to carry out (and to carry out all necessary reinstatement works in relation to) archaeological, environmental, ecological,	This right is necessary to enable SP Manweb to carry out additional survey work as may be required post consent and

Table 7 - Justification for the creation and acquisition of rights and imposition of restrictions: Class 6		
Class 6	Explanation of Rights	Justification
	agricultural, contamination, topographical and geotechnical surveys and investigations, including the taking and removal of soil samples and the sinking or boreholes and/or excavation of trial pits, and other like surveys and investigations for purposes in connection with the construction of the North Shropshire Reinforcement Project;	following vesting of the area of land subject to the right vested in SP Manweb.
i)	to prevent any works on or uses of the land which may interfere with the exercise of the Class 6 Rights in particular the right to prevent and remove the whole or any part of any building or fixed or moveable structure, tree, shrub or other plant or other thing whatsoever, and the right to prevent or remove any works or uses which alter the surface level, ground cover or composition of the land;	This right is necessary to protect the unimpeded access for the Proposed Development. The restrictions to be imposed are standard industry restrictions which SP Manweb imposes in relation to its operational equipment and/or apparatus.
j)	to install, erect, retain, use, inspect, maintain, renew, remove and relocate any unit, cabin or other structure and all related plant, equipment and machinery for welfare and/or security in connection with the construction of the North Shropshire Reinforcement Project.	This right is necessary to provide a temporary welfare/security cabin to be used by personnel engaged in the construction and installation of the Proposed Development.

5.1.11 The justification for the creation and acquisition of rights and imposition of restrictions under Class 7 is demonstrated in Table 8 below:

Table 8 Justification for the creation and acquisition of rights and imposition of restrictions: Class 7		
Class 7	Explanation of Rights	Justification
a)	for works at Oswestry substation comprising the installation of electrical switchgear and associated equipment (including 132kV cable sealing ends and 132kV circuit breaker) and underground cable and all associated rights;	The Proposed Development requires connection into the distribution network. These rights are therefore required to allow for works to be carried out at Oswestry substation to facilitate the connection of the Proposed Development into the distribution network.
b)	for works at Wem substation comprising the installation of a 132kV cable gantry, line isolator, associated busbars, a 132kV to 33kV transformer, 33kV cable and a 33kV circuit breaker and: (a) site preparation works and site clearance (including fencing); (b) levelling; (c) creation of hardstanding area; and (d) all associated rights.	The Proposed Development requires connection into the distribution network. These rights are therefore required to allow for works to be carried out at Wem substation to facilitate the connection of the Proposed Development into the distribution network.

5.2 JUSTIFICATION FOR ACQUISITION AND CREATION OF RIGHTS ON A PLOT BY PLOT BASIS

5.2.1 The justification for the creation and acquisition of new rights and the imposition of restrictions is explained in the tables within Sections 5.1.5 to 5.1.11 of this Statement above.

5.2.2 This Section 5.2 describes, on a plot by plot basis, which classes of rights are being acquired and why by reference to the relevant work number as described in Schedule 1 in the draft Order. In effect, Table 9 below pulls together the detail

in the Land Plans (DCO Documents 2.2.1 to 2.2.16) and Works Plans (DCO Documents 2.3.1 to 2.3.16) and should be read in conjunction with those plans:

Table 9 - Justification for acquisition and creation of rights on a plot by plot basis		
Plot Number	Rights class and sub-division	Reason why right is required by reference to Plot Number
1	7 (a)	Rights are required to carry out works to the existing substation to facilitate the connection of the 132kV underground cable into the existing substation.
2	2 (a), (b), (c), (d), (e), (f), (g), (h) 5 (a), (b), (c), (d), (e), (f) 6 (b), (c), (d)	<p>Rights are required to facilitate the construction and installation of the 132kV underground cable, together with ancillary works to drains/ditches; felling, trimming or lopping of trees; carrying out surveys; and access both on foot and by vehicle.</p> <p>Rights are required to facilitate the reinstatement planting and reinstatement drainage required in connection with the works carried out in constructing and installing the 132kV underground cable, including the ancillary works to drains/ditches; felling, trimming or lopping of trees; carrying out surveys; and access both on foot and by vehicle.</p> <p>Rights are required for the construction and maintenance of temporary gates and fences, together with the ability to access such works, in order to ensure the safe/secure construction of the 132 kV underground cable.</p>
3	2 (a), (b), (c), (d), (e), (f), (g), (h)	Rights are required to facilitate the construction and installation of the 132kV underground

5.3 ARTICLES OF THE DRAFT ORDER FOR THE PROPOSED DEVELOPMENT

5.3.1 Article 19 of the draft Order provides that in carrying out or using the Proposed Development and doing anything else authorised by the DCO, SP Manweb may, by virtue of section 158 of the Act, interfere with any easement, liberty, privilege, right or advantage annexed to land and affecting other land, including any natural right to support, or breach any restriction as to use of land arising by virtue of contract. It also provides that by virtue of section 152 of the Act, compensation may be payable under section 10 of the Compulsory Purchase Act 1965 for any such interference or breach.

5.3.2 Pursuant to Article 21 of the draft Order:

- All private rights and restrictive covenants over land subject to the compulsory acquisition of rights or the imposition of restrictions under the DCO are to be suspended and unenforceable or, where so notified by SP Manweb, extinguished in so far as in either case their continuance would be inconsistent with the exercise of that right or the burden of the restriction imposed;
- All private rights and restrictive covenants over land of which SP Manweb takes temporary possession under the DCO are to be suspended and unenforceable for so long as SP Manweb remains in possession of the land and so far their continuance would be inconsistent with the exercise of the temporary possession of that land.

5.3.3 Part 3 of the Book of Reference (DCO Document 4.3) identifies the easements or other private rights which may be interfered with, suspended or extinguished, pursuant to Article 21 of the draft Order as a result of the Proposed Development.

5.3.4 These powers are therefore justified on the basis that they will ensure the unimpeded construction, installation, operation and maintenance of the Proposed Development from any private rights and restrictions that may be inconsistent with, or interfere with, the Proposed Development.

5.3.5 Articles 26 and 27 of the draft Order for the Proposed Development provide for temporary use of land for carrying out the Proposed Development and temporary use of land for maintaining the Proposed Development respectively.

5.3.6 Whilst SP Manweb is seeking to acquire the permanent rights to carry out the Proposed Development, there will be instances where SP Manweb needs to take temporary possession of areas within the Order Limits. These rights are described in Class 6 of the Book of Reference (DCO Document 4.3) and include:

- Use of temporary laydown areas, storage areas, working areas and parking
- Construction of gates, fences and other boundary structures
- Pedestrian and vehicular access
- Vegetation removal
- Survey work
- Construction of welfare and security structures

5.3.7 Carrying out these activities, coupled with the power under Article 16 of the draft Order to survey and investigate any land within the Order Limits, will assist SP Manweb to ascertain where the Overhead Line and Underground Cable will be located and thus where SP Manweb will ultimately vest the rights and restrictions sought under the draft Order.

5.3.8 As such, the utilisation of Article 26 of the draft Order would be exercised before the acquisition of rights under Article 18 so as to enable the necessary micro-siting to take place. This ensures that SP Manweb minimises the extent of land over which it exercises its compulsory acquisition rights.

5.3.9 Given the nature of the Proposed Development, it is considered that it is not appropriate for SP Manweb to rely solely on Article 26 of the draft Order in order to construct and operate the Proposed Development and that a combination of both Article 26 and Article 18 is justified, reasonable and necessary.

5.3.10 Similarly, SP Manweb is seeking to acquire the necessary land rights to maintain the Proposed Development. However, these Class 1, Class 2, Class 3 and Class 4 rights will only apply to the final easement strip that SP Manweb will acquire pursuant to Article 18 of the draft Order for the Proposed Development, which will be within the Order Limits as shown on the Works Plans (DCO Documents 2.3.1 to 2.3.16). Maintenance may well require SP Manweb to enter onto land outside the final easement strip that SP Manweb will acquire (but still within the Order Land) and therefore it is necessary to include Article 27 in the draft Order to enable SP Manweb to use land temporarily for maintenance purposes. SP Manweb anticipate that the use of Article 27 will be limited. For these reasons, it is considered justified, reasonable and necessary for the draft Order to include both Article 27 and Article 18.

5.3.11 Accordingly, Articles 26 and 27, together with Article 18, will enable SP Manweb to secure the necessary rights to construct and install, operate and maintain the 132kV overhead line and underground cable unimpeded.

6 JUSTIFICATION FOR POWERS OF COMPULSORY ACQUISITION

6.1 JUSTIFICATION FOR POWERS OF COMPULSORY ACQUISITION

6.1.1 Under section 122 of the Act, a DCO which includes compulsory acquisition powers may be granted only if the conditions in sections 122(2) and 122(3) are met. The conditions to be met are:

- At section 122(2), that the land is required for the development to which the DCO relates or is required to facilitate or is incidental to the development, or the land is replacement land to be given in exchange under sections 131 or 132 of the Act; and
- At section 122(3), there is a compelling case in the public interest for inclusion of powers of compulsory acquisition in the DCO. The Secretary of State must be persuaded that the public benefits from the compulsory acquisition will outweigh the private loss suffered by those whose land is to be acquired.

6.1.2 The Tables in Section 5 above confirms why the acquisition of rights and imposition of restrictions in respect of each plot identified in the Land Plans (**DCO Documents 2.2.1 to 2.2.16**) is needed by reference to Schedule 1 to the draft Order for the Proposed Development.

6.1.3 Furthermore, and as explained in Section 2 of this Statement, the Further Updated Strategic Options Report (**DCO Document 7.7**) and Updated Line Route Report (**DCO Document 7.10**) describe how SP Manweb initially identified options for the proposed route for the Overhead Line and Underground Cable and how the preferred option progressed to be reduced from generally 100m width to form the Order Limits as shown on the Land Plans (**DCO Documents 2.2.1 to 2.2.16**).

6.1.4 Following the initial identification of the route, which was generally 100m in width, SP Manweb has reduced the route to the much narrower Order Limits required for the Proposed Development and considers that the area over which rights are sought and on which restrictions are to be imposed to be the minimum that is required in order to construct, install, operate and maintain the Proposed Development

6.1.5 There are a range of structures that would be required for the wooden poles forming the Overhead Line and these are described in the Construction Report (**DCO Document 7.2**) :

- Double H-Pole
- Intermediate Single Pole
- Intermediate H-Pole
- Section Single Pole
- Section H-Pole
- Angle Single Pole
- Angle H Pole

6.1.6 In order for the Overhead Line to connect into Oswestry substation, works are required at the Oswestry substation that include an underground cable to Long Wood. In addition works are for the undergrounding of the lower voltage lines and at Wem substation.

6.1.7 SP Manweb therefore considers that the section 122(2) condition is satisfied.

6.1.8 In respect of the section 122(3) condition, paragraph 13 of the Guidance states that the Secretary of State will need to be persuaded that there is compelling evidence that the public benefits that would be derived from the compulsory

acquisition will outweigh the private loss that would be suffered by those whose rights in land are to be acquired and over which rights are to be created. Paragraph 14 of the Guidance states that in determining where the balance of public interest lies, the Secretary of State will weigh up the public benefits that a scheme will bring against any private loss to those affected by compulsory acquisition.

6.1.9 Section 2 of this Statement describes the need for the Proposed Development, and, accordingly, it is clear that without the Proposed Development there is a risk to the security of the network. The public benefits derived from the compulsory acquisition therefore outweighs the private loss that would be suffered. SP Manweb therefore considers that the section 122(3) condition is satisfied.

6.1.10 Further, paragraphs 8 to 10 of the Guidance also set out a number of general considerations that an applicant must demonstrate to the satisfaction of the Secretary of State when justifying an order authorising compulsory acquisition. These are as follows:

- That all reasonable alternatives to compulsory acquisition (including modifications to the proposed development) have been explored;
- That the proposed interference with the rights of those with an interest in the land is for a legitimate purpose and is necessary and proportionate;
- That an applicant has a clear idea of how it intends to use the land which it is proposed to acquire;
- That there is a reasonable prospect of the requisite funds for the acquisition becoming available; and
- That the purposes for which compulsory acquisition of land powers are included in the DCO are legitimate and are sufficient to justify interfering with the human rights of those with and interest in the land affected.

6.1.11 The following sections set out the factors SP Manweb considers demonstrate that these general considerations are satisfied.

6.2 ALTERNATIVES TO COMPULSORY ACQUISITION

6.2.1 The Proposed Development is needed to reinforce the local distribution network in accordance with SP Manweb's statutory and licence duties. In order to construct, install, operate and maintain the Proposed Development, SP Manweb requires new rights and the imposition of restrictions, over third party land.

6.2.2 The Book of Reference (**DCO Document 4.3**), Land Plans (**DCO Documents 2.2.1 to 2.2.16**) and the Tables at Section 5 of this Statement show the rights and restrictions that are required and for what purpose. In each case, the rights and restrictions are required to deliver the Proposed Development and are proportionate to the degree of interference with the interests and rights of landowners. The Order Limits have been drawn so as to avoid any unnecessary interference with or extinguishment of private interests and rights. Furthermore, SP Manweb is seeking the ability to use, where appropriate, powers of temporary use to enable SP Manweb to identify the minimum easement width that it requires rather than vesting rights and restrictions in an area larger than is actually required.

6.2.3 SP Manweb is not seeking powers to acquire any land. Rather, it only seeking powers for the creation of rights and the imposition of restrictions.

6.2.4 SP Manweb is progressing discussions with landowners and tenants to reach voluntary agreements so as to try and avoid the need to use Article 18 of the draft Order. These discussions are proceeding well and it is anticipated that a significant percentage of voluntary agreements will be secured.

6.3 ALTERNATIVES TO PROPOSED DEVELOPMENT

- 6.3.1 As explained in Section 2 of this Statement, SP Manweb has a statutory duty to operate an economic and efficient system of electricity distribution. The Further Updated Strategic Options Report (**DCO Document 7.7**) describes the alternative options which were considered by SP Manweb for the reinforcement of the local distribution network.
- 6.3.2 Any alternative routes for a new 132kV overhead line and underground cable would also require the acquisition of rights over third party land. This means that the acquisition of rights over third party land cannot be avoided.
- 6.3.3 The decision by SP Manweb to progress the Proposed Development as opposed to the alternative options considered is described in the Further Updated Strategic Options Report (**DCO Document 7.7**), the Updated Line Route Report (**DCO Document 7.10**) and the Environmental Statement (**DCO Documents 6.1 to 6.16**). Reference should also be made to the Consultation Report (**DCO Document 5.1**) which summarises the responses of statutory and other consultees.

6.4 LEGITIMATE, NECESSARY AND PROPORTIONATE

- 6.4.1 SP Manweb is only seeking powers for the creation of rights and the imposition of restrictions and is not seeking to acquire land. As explained in Section 5 of this Statement, the classes of rights sought are legitimate, necessary and proportionate to enable SP Manweb to reinforce the local distribution network. The imposition of restrictions is legitimate, necessary and proportionate and necessary to protect the reinforcement of the Distribution Network as well as mitigation installed which is required as part of the Proposed Development. The rights and restrictions are industry standard and are no greater in extent than the rights and restrictions that SP Manweb seeks in its voluntary agreements.

6.4.2 Section 5 of this Statement identifies the purpose for which each right and restriction that is sought would be utilised and on which plot. The extent of each plot has been drawn to reflect the specific works that will be undertaken on each plot. This has resulted in a large number of plots being shown on the Land Plans. However, this ensures that SP Manweb is only seeking the powers to create rights and restrictions that it actually needs in order to construct and operate the Proposed Development on each individual plot.

6.4.3 On this basis, it is clear that SP Manweb is only seeking powers of acquisition that are legitimate, necessary and proportionate to allow the construction and operation of the Proposed Development.

6.5 AVAILABILITY OF FUNDS FOR COMPENSATION

6.5.1 The Guidance indicates that an applicant should be able to demonstrate that there is a 'reasonable prospect' of the requisite funds becoming available.

6.5.2 The Funding Statement (**DCO Document 4.2**) sets out how the Proposed Development would be funded and demonstrates that SP Manweb has secured sufficient financial resources to pay any compensation arising from the exercise of the compulsory acquisition and temporary use powers set out in the draft Order and to construct the Proposed Development.

6.5.3 Any compensation arising from the exercise of the compulsory acquisition will be assessed and payable in line with the statutory compensation code.

7 HUMAN RIGHTS

7.1 HUMAN RIGHTS

7.1.1 The Human Rights Act 1998 incorporated the Convention into UK law. The Convention includes provisions in the form of Articles, the aim of which is to protect the rights of the individual.

7.2 RELEVANT ARTICLES

7.2.1 The following Articles of the Convention are relevant to the Secretary of State's decision as to whether the draft DCO should be made so as to include powers of compulsory acquisition:

- Article 6: this entitles those affected by the powers sought in the draft DCO to a fair and public hearing of any relevant objections they may have to the granting of those powers. This includes property rights and can include opportunities to be heard in the decision making process.
- Article 8: this protects private and family life, home and correspondence. No public authority can interfere with these rights except such as in accordance with the law and is necessary in the interest of national security, public safety of the economic well-being of the country.
- Article 1 of the First Protocol: this protects the right of everyone to a peaceful enjoyment of possessions and provides that no one can be deprived of their possessions except in the public interest and subject to the relevant national and international laws and principles.

7.3 DUTIES OF DECISION MAKER

7.3.1 The Secretary of State, as the decision maker, is under a duty to consider whether the exercise of powers interacts with the rights protected by the Convention.

7.4 POTENTIAL INFRINGEMENT

7.4.1 The draft DCO has the potential to infringe the rights of persons who hold interests in land within the Order Limits under Article 1 of the First Protocol of the Convention. Such an infringement is authorised by law so long as:

- The statutory procedures for making the draft DCO are followed and there is a compelling case in the public interest for the inclusion of powers of compulsory acquisition in the draft DCO; and
- The interference with the Convention right is proportionate.

7.4.2 In preparing the draft DCO, SP Manweb has considered the potential infringement of the Convention rights in consequence of the inclusion of compulsory acquisition powers within the draft Order. SP Manweb considers that there would be a significant public benefit arising from the grant of the draft DCO; the need to distribute electricity generated as set out in Section 2 of this Statement. The benefit is only realised if the DCO is accompanied by the grant of powers of compulsory acquisition.

7.4.3 SP Manweb has concluded on balance that the significant public benefits outweigh the effects upon persons who own property within the Order Limits. For the small number of third party landowners affected by the exercise of the powers in the draft DCO, compensation is payable in accordance with the Statutory Compensation Code.

7.4.4 In relation to Article 6 of the Convention, there has been the opportunity to make representations regarding the preparation of the Application. In accordance with Part 5 of the Act, SP Manweb has consulted with persons set out in the categories contained in section 44 of the Act, which includes owners of land within the Order Limits and those who may be able to make claims either under sections 7 and 10 of the Compulsory Purchase Act 1965 in respect of injurious affection and claims under Part 1 of the Land Compensation Act 1973. Also,

the beneficiaries of rights overridden by the exercise of powers in the draft DCO would be capable of making claims under section 10 of the Compulsory Purchase Act 1965.

7.4.5 Representations can also be made in response to any notice given under section 56 of the Act for consideration at examination of the draft DCO by the Examining Authority and in any written representations procedure which the Examining Authority decides to uphold or at any compulsory purchase hearings held under section 92 of the Act.

7.4.6 It is important to note that all of the acquisition powers in the draft Order relate to the creation and acquisition of rights and the imposition of restrictions and the temporary use of land, rather than the acquisition of freehold and leasehold interests.

7.4.7 Should the DCO be made, any person aggrieved may challenge the DCO in the High Court if they consider that the grounds for doing so are made out pursuant to section 118 of the Act.

7.4.8 In relation to matters of compensation for land to be acquired, affected persons have the right to apply to the Upper Tribunal (Lands Chamber), which is an independent judicial body to determine the compensation payable.

7.5 CONCLUSION

7.5.1 For the above reasons, any infringement of the Convention of those whose interests are affected by the inclusion on the DCO of powers of compulsory acquisition, is proportionate and legitimate and is in accordance within National and European law. For the reasons set out in this Statement, SP Manweb considers that there is a compelling case in the public interest for the exercise of such powers of compulsory acquisition. SP Manweb considers that it would, therefore, be appropriate and proportionate for the Secretary of State to make the DCO, including the grant of compulsory acquisition powers.

8 ACQUISITION BY AGREEMENT

8.1 DESCRIPTION OF PROGRESS MADE IN RELATION TO VOLUNTARY ACQUISITION OF RIGHTS

8.1.1 SP Manweb has undergone extensive consultation with those parties with an interest in the land within the Order Limits and has made offers to acquire the necessary rights by voluntary agreement subject to the DCO being granted and the Proposed Development commencing.

8.1.2 SP Manweb will continue to discuss the Proposed Development with interested parties and seek voluntary agreements in order to try to avoid the need for compulsory acquisition.

8.1.3 SP Manweb is progressing negotiations with landowners and tenants to reach voluntary agreements so as to try and avoid the need to use Article 18 of the draft Order. These negotiations are receiving positive responses and it is anticipated that a significant percentage of voluntary agreements will be secured.

8.1.4 As recognised by the Guidance, in parallel with negotiations, SP Manweb will seek to compulsorily acquire rights in land in any event through the draft Order. This is to ensure that in the event that agreements are not reached, SP Manweb can deliver its statutory duties in relation to the Proposed Development unimpeded without potential delay should for any reason the voluntary acquisition of land rights be ultimately unsuccessful.

8.1.5 Similarly, including compulsory acquisition powers in the draft Order is important for the following reasons:

- An option may be obtained by agreement prior to the DCO application or during the DCO application process, rather than the substantive rights itself. The compulsory powers therefore provide a fall-back should the voluntary

agreements fail and cover instances where the person with an interest in land is unwilling/or unable to grant the relevant land interest or right once the option has been exercised. These powers are important as they ensure that there is no risk to the delivery of the Proposed Development.

- Including all interests in the draft Order allows all required rights and restrictions to be obtained in the same way and through one process, potentially by General Vesting Declaration ("GVD") if it is not possible to secure rights voluntarily. This is an effective way of compulsorily acquiring rights and restrictions in land from multiple owners.

8.1.6 Compulsory acquisition by GVD is effective against all interests in the land, so avoiding the risk of a failure to disclose a relevant interest; the GVD is effective even against unknown interests.

8.1.7 Compulsory powers are also more readily enforceable, so reducing additional risk, cost and delay.

8.1.8 Paragraph 25 of the Guidance confirms that for long, linear schemes, such as the Proposed Development:

'It may not be practical to acquire by agreement each plot of land. Where this is the case it is reasonable to include provision authorising compulsory acquisition covering all the land required at the outset.'

8.1.9 Without the powers of compulsory acquisition, the need for the Proposed Development may not be met because the rights required in the land within the Order Limits may not be assembled, uncertainty as to construction would continue and SP Manweb considers that its objectives would not be achieved.

8.1.10 In defining the areas for permanent acquisition of rights and restrictions the Order land has been identified to ensure that the Proposed Development can be undertaken.

9 SPECIAL CONSIDERATIONS

9.1 CROWN INTERESTS

9.1.1 No Crown interests have been identified as affected by the Proposed Development. As such Part 4 of the Book of Reference (**DCO Document 4.3**) is without item

9.2 SPECIAL CATEGORY LAND

9.2.1 Land identified as Special Category Land is shown on the Land Plans (**DCO Documents 2.2.1 to 2.2.16**) and is identified in Part 5 of the Book of Reference (**DCO Document 4.3**).

9.2.2 The Book of Reference (**DCO Document 4.3**) clearly identifies in Part 5 that Special Category Land covers Plots 2, 3 and 4.

9.2.3 In order to construct and install, operate and maintain the Overhead Line and Underground Cable, it is necessary for SP Manweb to create interests and impose restrictions in Plots 2, 3 and 4.

9.2.4 Article 28 of the draft Order provides, in accordance with section 132(2) and section 132(3) of the Act, for the Special Category Land required for the Proposed Development to be discharged from all rights, trusts and incidents to which it was previously subject, where their continuance would be inconsistent with the exercise of the rights and restrictions included in the draft Order. This is subject to the proviso that the Secretary of State is satisfied that any Special Category Land, when burdened with the rights and restrictions, will be no less advantageous to any affected persons.

9.3 STATUTORY UNDERTAKERS' LAND

- 9.3.1 As identified in Parts 1 and 2 of the Book of Reference (**DCO Document 4.3**), Highways England, Wales and West Utilities, Severn Trent Water Limited, Environment Agency, Canal and River Trust, Shropshire Council (as Highway Authority), Network Rail, BT Telecommunications (Openreach) and National Grid have interests in the land within the Order Limits.
- 9.3.2 Article 28 in the draft Order provides the power to extinguish or suspend the rights of, and remove or reposition apparatus on Statutory Undertakers' Land. It also provides the power to create and acquire new rights over Statutory Undertakers' Land.
- 9.3.3 Article 28 amends the model provision to allow for the suspension of rights of a Statutory Undertaker (for example where land is being used temporarily under the draft Order) rather than just extinguishment. The Article also provides the ability to impose restrictions over Statutory Undertakers' Land.
- 9.3.4 The ability to acquire Statutory Undertakers' Land compulsorily has been removed, as this is not proposed in the context of the Proposed Development. In all cases the powers conferred by Article 28 are subject to the protective provisions within Schedule 6 of the draft Order.
- 9.3.5 SP Manweb has written to all the Statutory Undertakers noted in 9.3.1 and are in the process of agreeing protective provisions in relation to all their interests which will be affected by the Proposed Development.
- 9.3.6 It is envisaged that with the protective provisions secured in the draft Order, section 138(4) of the Act will apply since the Secretary of State can be satisfied that any extinguishment or removal of relevant apparatus will only take place if necessary and with the agreement of the applicable Statutory Undertaker.

10 CONCLUSIONS

10.1.1 SP Manweb submits, for the reasons explained in this Statement, that the inclusion of powers of compulsory acquisition in the draft Order for the Proposed Development meets the conditions of section 122 of the Act as well as the considerations in the Guidance.

10.1.2 The acquisition and creation of rights, the imposition of restrictions and the temporary use of land, together with the overriding of interests, rights and restrictive covenants and the suspension or extinguishment of private rights is no more than is reasonably required to facilitate or is incidental to the Proposed Development.

10.1.3 Furthermore, the rights and restrictions sought is no more than is reasonably necessary in order to construct and install, operate and maintain the Proposed Development. The Order Limits have been reduced as much as possible and are proportionate.

10.1.4 The need for the Proposed Development established in NPS EN-1 demonstrates that there is a compelling case in the public interest for the inclusion of compulsory acquisition powers in the draft Order.

10.1.5 All reasonable alternatives to compulsory acquisition have been explored. Given the national and local need for the Proposed Development and the support for it found in policy, the compulsory creation of rights, imposition of restrictions and the temporary use of land, together with overriding of interests, rights and restrictive covenants and the suspension or extinguishment of matters affecting the Order Land identified by SP Manweb is justified.

10.1.6 The proposed interference with the rights of those with an interest in the Order Land is for a legitimate purpose, namely the Proposed Development, and is necessary and proportionate to that purpose. SP Manweb considers that the very substantial public benefits to be derived from the proposed compulsory

acquisition powers in the draft Order would decisively outweigh the private loss that would be suffered.

10.1.7 SP Manweb has set out clear and specific proposals regarding how the Order Land will be used.

10.1.8 The requisite funds are available to meet any costs of acquisition and compensation payable as a result of the use of powers of compulsory acquisition, as well funding the construction of the Proposed Development.

10.1.9 The purpose of the powers of compulsory acquisition for the Proposed Development in the draft Order is entirely legitimate and justifies interfering with rights of those persons with an interest in the land proposed to be acquired.
