--	----------

TABLES

Table 1 – Cumulative Assessment Matrix	2
--	---

APPENDIX 14.4 MARINE ARCHAEOLOGY CUMULATIVE ASSESSMENT MATRIX

- 1.1.1.1 This document should be read in conjunction with Chapter 14 (Marine Archaeology) of the Environmental Statement ('ES') Volume 1 (document reference 6.1.14) and the Chapter 29 (Cumulative Effects) of the Environmental Statement ('ES') Volume 1 (document reference 6.1.29).
- 1.1.1.2 Project/plans shown in Figures 29.1-29.5 of the ES Volume 2 (document references 6.2.29.1, 6.2.29.2, 6.2.29.3, 6.2.29.4 and 6.2.29.5) and in Table 1 below have been sourced from interrogation of the Marine Management Organisation's ('MMO') Marine Information System¹, from the Planning Inspectorate's ('PINS') Programme of Projects, relevant Local Planning Authority ('LPA') planning portals and where relevant the Crown Estate Maps and Geographical Information System ('GIS') information.
- 1.1.1.3 This list was updated on 14 October 2019, following its original inclusion in the Preliminary Environmental Information Report ('PEIR') which was consulted upon Feb – April 2019. This list has been agreed with the MMO in October 2019. Two additional projects were added to the list in October 2019.
- 1.1.1.4 Further information relating to each item can be obtained through the MMO, PINS website and LPA planning portal. Distances are approximate (using GIS) and are measured from the closest point of the project/plan polygon as shown on the MMO Marine Information System (where relevant) to the closest point of the Marine Cable Corridor shapefile (see Figure 3.1 of the ES Volume 2, document reference 6.2.3.1).
- 1.1.1.5 The ID numbers in Table 1 represent the relevant polygon numbers as shown in Figures 29.1-29.5, where the project is located. ID numbers with * indicate that they are not illustrated on the figures as no spatial data were found within the spatial datasets sourced but information was found online.
- 1.1.1.6 The Zone of Influence ('ZOI') is considered to be the spatial extent of the Marine Cable Corridor within the UK Marine Area.
- 1.1.1.7 Projects identified in the long list in Table 1 falling within the ZOI were screened in for further consideration.
- 1.1.1.8 The Planning Inspectorate Cumulative Effect Assessment Matrix (Appendix 1) from Advice note 17² has been used in compiling this data.

The PINS matrix uses three tiers to classify the stage of a project:

- Tier 1, projects that are: under construction³; permitted application(s), whether under the Planning Act 2008 or other regimes, but not yet implemented; submitted application(s) whether under the Planning Act 2008 or other regimes but not yet determined;
- Tier 2, projects that are on the Planning Inspectorate's Programme of Projects where a scoping report has been submitted.
- Tier 3, projects that are: on the Planning Inspectorate's Programme of Projects where a scoping report has not been submitted; identified in the relevant Development Plan (and emerging Development Plans - with appropriate weight being given as they move closer to adoption) recognising that much information on any relevant proposals will be limited; identified in other plans and programmes (as appropriate) which set the framework for future development consents/approvals, where such development is reasonably likely to come forward.

¹ <http://defra.maps.arcgis.com/apps/webappviewer/index.html?id=3dc94e81a22e41a6ace0bd327af4f346>

² <https://infrastructure.planninginspectorate.gov.uk/wp-content/uploads/2015/12/Advice-note-17V4.pdf>

³ Where other projects are expected to be completed before construction of the proposed Nationally Significant Infrastructure Project ('NSIP') and the effects of those projects are fully determined, effects arising from them should be considered as part of the baseline and may be considered as part of both the construction and operational assessment. The ES should clearly distinguish between projects forming part of the baseline and those in the Cumulative Effects Assessment ('CEA').

Table 1 – Cumulative Assessment Matrix (ID Nos with * indicate that they are not illustrated on the accompanying figures as no spatial data was found within the datasets sourced but information was found online).

Cumulative Projects					Stage 1		Stage 2			
ID No.	Application /Case Ref.	Applicant and Brief Description	Distance from Project (km)	Tier	Within Zone of influence (ZOI)?	Progress to stage 2?	Overlap in temporal scope?	Scale and nature of development likely to be significant effect?	Other Factors	Progress to Stage 3/4?
Major Projects (Offshore Wind Farms, Interconnector Cables, Oil and Gas) – Figures 29.1 and 29.2										
1	None	AQUIND Interconnector in French Exclusive Economic Zone ('EEZ') and French territorial waters.	0	2	No	No				
N/A	None	AQUIND Interconnector Unexploded Ordnance ('UXO') Clearance	0	1	Yes	Yes	No Timescales and any requirements for UXO clearance for the AQUIND Interconnector are unknown at this stage. However, it is currently expected that should the works be required i.e. UXOs are identified in the Marine Cable Corridor and can't be micro-sited around, they will be undertaken prior to the commencement of the construction phase of the Proposed Development. Applicant will monitor the progress of the development of these plans and should further information become available it will be assessed if required. It is otherwise anticipated that a cumulative assessment would be undertaken including both projects as part of any application for UXO clearance work, where required.	No	It is not currently known if any UXOs will be identified and if so whether they will need to be removed and how e.g. do they need to be detonated. In the absence of detail regarding what, if any, UXO clearance will be required e.g. how many UXOs, where they are located, and how they will be cleared, it is considered it is not possible to undertake a meaningful assessment of the possible cumulative effects. Should a UXO licence be required, it will be subject to the relevant Environmental Impact Assessment ('EIA') and Habitats Regulations Assessment ('HRA') requirements including the needs to consider cumulative / in combination effects.	No
2	DCO/2013/00006 EN010032	Rampion Offshore Wind Limited, Rampion Wind Farm	13.64	1	No	No	Offshore Windfarm ('OWF') is now fully operational			
3	N/A	E.on / Rampion offshore wind limited, Rampion Wind Farm Extension	0 (extension area overlaps Proposed Development)	3	Yes	Yes	Rampion Ext is in the very early stages of planning. The Crown Estate ('TCE') recently confirmed that it is one of seven extension OWF projects that will progress to undertaking project specific environmental assessments to inform planning consent applications following conclusion of their plan level HRA. No information regarding the proposed timescales for development is available at this stage.	No – mitigation measures will be implemented to reduce any effects on archaeological receptors.	The is insufficient project information on the Rampion Extension project to be able to undertake a meaningful CEA. Should this project be taken forward to application, then the possible cumulative effects with the other project, including he Proposed Development where relevant, will need to be considered.	No
4		LEMS (Engie), Dieppe - Le Tréport	58.99	1	No	No				
5		Fécamp Offshore Wind Farm - in French EEZ	33.17	3	No	No				
6		Cote d'Albatre OWF	42.52	1	No	No	No recent information			
7	MLA/2016/00209/2	NATIONAL GRID IFA2 LTD,	0.44	1	No	No	Licence end date January 2117.	No.		

Cumulative Projects					Stage 1		Stage 2			
ID No.	Application /Case Ref.	Applicant and Brief Description	Distance from Project (km)	Tier	Within Zone of influence (ZOI)?	Progress to stage 2?	Overlap in temporal scope?	Scale and nature of development likely to be significant effect?	Other Factors	Progress to Stage 3/4?
		IFA2 Electricity Interconnector					Construction is due to be completed in 2020 therefore no overlap in temporal scope (worse case programme for construction of the Proposed Development is for 2021-2023). The marine ornithology baseline will be unaffected by this project.	Any disturbance is likely to be temporary therefore not significant.		
8	MLA/2018/00470	NATIONAL GRID IFA 2 LIMITED, IFA2 Interconnector - Unexploded Ordnance Activities – DC cables redline	0.44	1	No	No	Licence exp 12/2020 so works will be complete before work on the Proposed Development commences. (worse case programme for construction of the Proposed Development is for 2021-2023). No overlap.			
9	MLA/2018/00470	NATIONAL GRID IFA 2 LIMITED, IFA2 Interconnector - Unexploded Ordnance Activities – AC cables redline	12.84	1	No	No	Licence exp 12/2020 so works will be complete before work on the Proposed Development commences. (worse case programme for construction of the Proposed Development is for 2021-2023). No overlap.			
10	MLA/2018/00470	NATIONAL GRID IFA 2 LIMITED, IFA2 Interconnector - Unexploded Ordnance Activities – Solent detonation zone	5.53	1	No	No	Licence exp 12/2020 so works will be complete before work on the Proposed Development commences. (worse case programme for construction of the Proposed Development is for 2021-2023). No overlap.			
11	MLA/2019/00017	NATIONAL GRID IFA 2 LIMITED, IFA2 Interconnector - Temporary Investigative Trial Pits	12.94	1	No	No	Licence exp 02/2020 so works will be complete before work on the Proposed Development commences. (worse case programme for construction of the Proposed Development is for 2021-2023). No overlap.			
12*		Oil and Gas Authority (OGA) 31st Offshore Licensing Round Blocks for this round were awarded on 04/06/2019. The blocks that were previously intersecting the Proposed Development 99/12, 99/13 and 99/14, were not awarded a licence. Awarded blocks 98/12 & 98/11b were awarded to Corallian Energy Ltd and are the closest blocks which are greater than 41 km to the west of the Proposed Development.	>41	3	No	No
