APPENDIX 16.15 ONSHORE ECOLOGY CUMULATIVE EFFECT ASSESSMENT MATRIX (STAGE 1 & 2)

1.1. INTRODUCTION

- 1.1.1.1. This document should be read in conjunction with Chapter 29 (Cumulative Effects) of the Environmental Statement ('ES') Volume 1 (document reference 6.1.29), Chapter 16 (Onshore Ecology) of the ES Volume 1 (document references 6.1.29 and 6.1.16), and Appendix 16.16 (Onshore Ecology Cumulative Effects Assessment Matrix (Stage 3 & 4)) of the ES Volume 3 (document reference 6.3.16.16).
- 1.1.1.2. The Cumulative Effects Assessment ('CEA') for the Proposed Development follows the recommended approach as detailed by the Planning Inspectorate ('PINS') in PINS Advice Note Seventeen (Planning Inspectorate, 2015). This document summarises the first stages of the CEA approach which include:
- Stage 1 – Establish a Zone of Influence ('ZOI') for each environmental discipline and identify long list of 'other developments'; and
 - Stage 2 – Identify a shortlist of 'other developments'.
- 1.1.1.3. In order to screen projects for the cumulative effects assessment relating to Onshore Ecology, the following threshold criteria has been applied:
- The ZOI for other developments has been identified based on their location, scale and purpose, and the sensitivity of particular ecological features they could interact with. Determination of the ZOI has used similar principles as to defining the Study Area in Chapter 16 (Onshore Ecology). The ZOI was defined as the following distances:
 - DCO projects (likely to be large-scale and potential for widespread effects on biodiversity) and strategic linear infrastructure or coastal defence projects that could intersect with Natura 2000 sites and their qualifying features – 10 km zone of influence.
 - Strategic linear infrastructure or coastal defence projects that could intersect with other statutory designated sites and their qualifying features – 2 km zone of influence.

- Large-scale residential (>100 dwellings) or commercial developments, non-strategic infrastructure projects such as link roads, junctions, rail improvements and urban renewal schemes – 2km zone of influence.
- All other developments – 100m zone of influence.
- The scale and nature of other developments: projects greater than 0.5 ha, used as a threshold for likely significant effects in Schedule 2 of the EIA Regulations. However, it is also acknowledged that some projects under this threshold may give rise to cumulative effects, so projects within 100 m of the Order Limits are included due to their proximity to the Proposed Development.
- Temporal scope: construction would need to fall within 1 year with Aquind construction for cumulative construction effects to be applied.

1.1.1.4. Table 1 lists the long and short list of developments for consideration as part of the CEA for the Proposed Development.

62	North Portsea Island Coastal Flood Defence Scheme, Eastern Road and Kendall’s Wharf (19/00706/FUL)	Phase 4 of the North Portsea Island Coastal Flood Defence Scheme is a combination of two distinct sections: Kendall’s Wharf and Eastern Road. The full length of the frontage is 2,4 km (300 m for Kendall’s Wharf and 2,1 km for Eastern Road). The sea defences are being raised to +4,8 m AOD along the frontage to accommodate a 1 in 500 Standard of Protection (SOP). The road raising and steel sheet piles of Kendall’s Wharf works will be raised to a lower level as set back from the coast. The Kendall’s Wharf defences tie in with Anchorage park embankment defences (constructed in 2016) in the North and are set landward of Kendall’s Wharf aggregates, who are responsible for their own flood protection. The first c. 150 m of sea defence will be a raised earth embankment with a 3 m crest and continuation of the 2 m wide coastal path. This will tie into an area of road raising landward of Kendall’s Wharf. South of the road will be a 150 m steel sheet pile wall which will tie into the coastal defences at Eastern Road. The scope of the works for Eastern Road, at summary level, comprises of the construction of a reinforced seawall, including sheet pile and bearing pile installation with local realignment. Part of this will be an encasement and part new sea wall with a stepped revetment.	Southern boundary of site adjacent to Order Limits	Emerging - contract out for tender. Documentation for bidders was due for submission by 29/06/18. Kendall’s Wharf - Target commencement 09/2019. Target completion 04/2020. Eastern Road seawall – Target commencement 04/2020. Target completion 10/2022.
