**Subject:** Objection to Aquind Interconnector

Good evening

My objection to this project is based around the chaos that will be caused within Portsmouth

Firstly your initial consultation was very flawed. You went out asking people their views, whether it was their property and scared them as they thought of it as compulsory purchase.

Currently you placed all information in libraries that are nowhere near the affected areas. Why not put them in Baffins and Milton who are the very nearest? The elderly could not travel that far either

Last minute publication of the route so nobody could comment on exact routes from the landing on shore at Eastney to the Eastern Road (The plans are not very explanatory either)

You will be going through residential streets and also working outside of an infant school in Moorings Way. Major disruptions and causing parking and health issues.

This city is an Island and one of the most densely populated cities in the UK. Why was this chosen?

There are only 3 roads connecting the city to the mainland. You are intending to restrict traffic in the main non motorway road out of the city for months.

Will you be ensuring that residents' properties will not be affected and if any issues occur that you would be recompensing them? Will you be carbon neutral during the time?

Martin Lock

Milton resident
