Subject: Objection to disruption of laying cables / digging over Milton and Eastney Allotment Association
Date: 05 October 2020 10:50:33

To whom it may concern,

I would like to put forward to you my objections concerning the proposed plans for the laying of pipes / cables by Aquind.

I am an allotment holder on this site and have a plot on the area highlighted for disruption.

I have structures that would not be easily replaced if removed.

I grow most of my food on my allotment and object to anyone who would stop me from doing so.

I have protected Newts living in my pond on my plot.

My allotment has been a sanctuary to me and my elderly father through the pandemic. Without it I would not have coped. Any disruption to this and not being able to access my plot will have a significant impact on my mental health.

Along with the above personal objections I would also like to highlight the following issues that will have an impact on everyone living in the area whether they have an allotment or not.

Massive disruption to residents.

Air quality which is already awful.

Wildlife disruption.

The negative impact this will have on peoples mental health many of which use the allotment site as a place of refuge and sanctuary.

The negative impact on peoples health from not being able to grow their own food.

The economic impact on people who will have to buy food as they wont be able to grow their own.

Regards,

Kelly Martin
