Subject: Aquind Interconnect Cable in Milton
Date: 06 October 2020 11:58:50

Dear Sirs ,

I own [REDACTED] and would like to lodge my objection to the proposed plans for the laying of the interconnect cable through Milton. My objection is based on a number of grounds:

1. I am concerned to learn that Milton allotments may be lost as a result of these plans. I rent a plot on the allotments and it integral to my life and being part of the local community. This open space allows me to enjoy some nature with the children and is an activity I undertake with all the family in the outdoors. To lose this amenity would be devastating. Having this outdoor space especially during lockdown was invaluable. It gave purpose and focus during a very difficult time. The allotments also provide a past time for much of the aged community, and I think above all else this area must be preserved for them. Furthermore, the allotments provide a safe haven for much wildlife, including some protected species.
2. I am concerned at the disruption to the Eastern Road as a result of this proposal. This road is already congested and the closest route out of town for residents in Milton without needing to cut across the city to exit via Southsea. If the Eastern Road cannot be used then this is going to cause more gridlock in an already overloaded city. The disruption and inconvenience this is going to cause far outweighs any benefits by this proposals.
3. Some of the cable is proposed to run down Locksway Road with a connector on the corner of my block (on 274). I am concerned that the laying of this cable will jeopardise the structural integrity of my home. The land behind us was once a canal and so clay. To disturb the ground further with this cable is a massive concern as to the damage it may cause to the foundations of the houses on Locksway Road. Furthermore, I am concerned that the connector/interchanger will adversely affect the appeal of houses on my block thus affecting market value. I have been given no assurance as to whether the connector/interchanger is damaging to health or the environment.

For the reasons stated above, I strongly oppose the proposed plans.

Kind regards,

Karen Pool
