EN020022)RULE 13(6) OF THE INFRASTRUCTURE PLANNING (EXAMINATION PROCEDURE) RULES 2010**

NOTICE IS HEREBY GIVEN in accordance with Rule 13 of the Infrastructure Planning (Examination Procedure) Rules 2010, that hearings are due to be held by the Examining Authority for the Examination of the application made by AQUIND Limited (the '**Applicant**') of OGN House, Hadrian Way, Wallsend, Tyne and Wear, NE28 6HL for a Development Consent Order (**DCO**) under sections 35 and 37 of the Planning Act 2008 (the '**Application**'). The Application was accepted for Examination on Thursday 12 December 2019 and the Examination commenced on Wednesday 9 September 2020. The Planning Inspectorate's reference number for the Application is EN020022. In light of the current public health situation due to Covid-19 these hearings will be held virtually as indicated below.

SUMMARY OF THE PROJECT

AQUIND Interconnector ('**Project**') is a new 2,000 MW subsea and underground High Voltage Direct Current ('**HVDC**') bi-directional electric power transmission link between the South Coast of England and Normandy in France. By linking the British and French electric power grids it will make energy markets more efficient, improve security of supply and enable greater flexibility as power grids evolve to adapt to different sources of renewable energy and changes in demand trends such as the development of electric vehicles. The Project will have the capacity to transmit up to 16,000,000 MWh of electricity per annum, which equates to approximately 5% and 3% of the total consumption of the UK and France respectively.

The Application seeks development consent for those elements of the Project located in the UK and the UK Marine Area ('**Proposed Development**'). The Proposed Development includes:

- HVDC marine cables from the boundary of the UK exclusive economic zone to the UK at Eastney in Portsmouth;
- jointing of the HVDC marine cables and HVDC onshore cables;
- HVDC onshore cables from Eastney to Lovedean;
- a Converter Station and associated electrical and telecommunications infrastructure at Lovedean;
- high Voltage Alternating Current ('**HVAC**') onshore cables and associated infrastructure connecting the Converter Station to the Great Britain electrical transmission network, the National Grid, at Lovedean Substation; and
- smaller diameter fibre optic cables to be installed together with the HVDC and HVAC cables and associated infrastructure.
