---

I wish to complain again about the plan to lay an electric cable through Portsmouth.

If we need a cable from France surely it should come ashore where it can be connected immediately it comes ashore. Portsmouth is one of the most densely populated city's on the south coast. It will cause pandemonium, and with every month that passes Aquind keep moving the goal posts. The latest being they want to destroy an entire woodland, at a time when we are being told we must plant trees to save the planet.

This is a cable that no one wants, please **do not let this happen**.

I A CLEUGH
