Hello

One last plea not to let this go ahead, for the numerous reasons myself and others have already stated. Our Island will be destroyed, and the impact on the residents is untenable.

If allowed it will destroy flora & fauna, precious green space will be destroyed along with its habitat. In addition to our island being destroyed, pollution being increased when we are already at dangerous levels... this will hugely impact the physical & mental health of residents!

The stress of the disruption, one of our three main roads being dug up, our city in chaos and highly likely gridlocked. Emergency services will not be able to travel in a timely way...leading to fires burning longer; victims of road traffic accidents being stuck in cars longer; residents delayed getting to medical appointments; people having heart attacks and strokes unable to get to a tertiary hospital to get the care needed, leading to poor outcomes & deaths.

The list goes on and on.

PLEASE listen to us! Even

Our local political parties are united in this cause!

Regards

Ali Gregory
