Dear sirs

I am writing again to object to the proposed Aquind project.

This ecologically unsound project will create destruction all along it's route, particularly Langstone Harbour, an SSSI, SPA and a Ramsar site, and as far as Lovedean & areas bordering The Southdowns National Park.

The recent BBC panorama programme outlined some very dubious financial transactions which were linked to the people connected to the project, this is completely unacceptable. Add to that the support the business secretary has expressed, in writing, for the Aquind project whilst also denying support on national television! Is he not completely the wrong person to be making this decision, he surely cannot claim to be impartial?

The electricity will be generated by nuclear power, which is not renewable and creates problems of disposal. Obtaining our electricity from another country also leaves the UK vulnerable to "switch off"

The UK needs to invest in renewable energy such as wind, solar & wave. Nuclear is not the way to go.

This plan is damaging & unnecessary and I urge you not to approve it.

Yours sincerely

Catherine Thomas
