---

I fully agree with all of our colleagues letters of objections.

I'm not a well educated man, but I can understand things, that a lot of educated (higher ups can't understand), I have noticed this many times. I

When I was very very young boy I would ask my mother, mum can I have (this or that) and their would be 2 answers Yes or No, if it was yes I could have if was no I couldn't have. If I wanted to do something i would say mum can I do (this or that) again 2 answers Yes or No if it was No I couldn't have.

Did you understand? Yes is Yes and No is No.

What part of No is it you Don't understand?

If you stood on metal and I said hold on to that 750 volt dc cable, would you do it YES ? or NO ?, you might understand now.

WE DON'T WANT OR NEED IT.

You seem to me as overgrown kids ( oh please let us have it oh please oh please oh please let us do it) pathetic.

WE DON'T NEED OR WANT IT AT ALL
