**Subject:** Objection to Aquind interconnector, Portsmouth  
**Date:** 18 November 2021 17:59:06

---

Dear Secretary of State,

I am objecting to the routing of the Aquind interconnector through Portsmouth.

The route that is planned for this interconnector will cause nothing but chaos and damage to the already densely populated, congested and polluted city of Portsmouth.

The French government have publicly stated they will cut off electricity to the Channel Islands if they don't get their way on fisheries. They could do the same to the Aquind interconnector at any time.

The UK should be supplying the energy needs for the UK.

I do not believe you can possibly make an impartial decision on this project when I hear you stated on the Andrew Marr show that you have no knowledge of this particular project, when there are letters that clearly show otherwise.

I personally am very concerned about the number of MPs that Aquind have been "giving" money to. We can only guess what they expect for that money.

Signed:

Mr K J Gardner
