To who it may concern,

As the deadline for my objection to the Aquind Interconnector approaches , I dread to think this will go ahead.

The dreadful impact this will have on the local area will go on for years,

This is not environmentally friendly, not even supplied by a friendly company. The plug can be pulled any time, the cost of power can be increased we could be held to ransom. The threat by the French government to the press of a switch to turn off our power is inconceivable.

We need to invest in local renewable energy. All new building projects should have their own renewable power source.

There are alternatives why are we not using them .

Best Regards,

Julie Mathis
