To whom I hope it concerns,

I am writing in objection to Aquind on many grounds. The disruption and devastation of our city and very limited greenland is not worth this.

From my knowledge, there are thousands opposed to this, yet in our seemingly democratic country, these voices are barely acknowledged, let alone listened to or considered. With the state of affairs the conservative party and their leader are currently in, it's time we as a country start to see our government listening to the people before an uprising is our last option.

Start acting for the majority citizens of this country, and not the minority elitests who live nowhere near this obscene project. If the people are not listened to, they will stop listening themselves- and whatever rules or regulations you try to enforce will be overthrown by the majority in force, I predict.

Yours sincerely,
Lucy Ellis
