Kerinda Green

Dear sirs

I 100% object to Aquind.

The project is based on bribes and donations to a corrupt government

The whole premise of the project is wrong

You have just slapped a charge for emissions on central Portsmouth and this plan will raise emission levels due to the traffic pollution and roadworks that this will cause

The project has better routes than to the island of Portsea

Better investment would be for British solutions such as nuclear

You are supposed to represent the people that you govern, why are you not listening???

Stop this project now

Kerinda
