Hello

Please STOP AQUIND!!!

Basically, this project is an ecologically destructive plan which will be disastrous for Portsmouth and parts of South East Hants up to the Lovedean substation, and Langstone harbour and it's ecosystem. The impact this would have is enormous.

Also, we are living with dangerously high levels of pollution in Portsmouth, if this were to proceed, it would be the tipping point. This will hugely impact the physical & mental health of residents!

As outlined in the BBC Panorama documentary, the financing is very suspicious, and I, along with many others believe that Kwarsi Kartang should be removed from this project! Corruption has been a basis for Aquind which is absolutely shameful!!

This unnecessary and damaging plan must be stopped now.

PLEASE DON'T DESTROY OUR ISLAND CITY and the health of residents and wildlife! Please have a heart and imagine how you would feel if the area you live in was needlessly ripped apart!!

If this proceeds it would be like ripping the lungs out of our city!!!

Regards

Ali Gregory
