Subject: Aquind objection

I am very strongly against this project. I have been looking at the damage which it will cause and cannot see why we should want to have it in our city. It will do harm to our environment to our people and to our energy security.

France does not want it, England does not want it. You must make sure that it is stopped and stopped for good.

I have lived in Portsmouth for many years and as an 80-year old allotment user feel threatened by your plans to damage a very vulnerable location. The same thing applies along the route.

Why should we have this absurd Project? It does no good to us - it only does good to the company who own it.

It must be stopped. Thank you.
