Subject: Power cable

Categories: Consultation Response

Sir or Madam,

I write to register my strong objection to the proposed cable installation between France and Hampshire.

I live on London Road which is part of the proposed route of the installation.

The disruption and destruction to this part of Hampshire and especially my home and the road outside is quite unacceptable especially given the relatively small percentage of our total needs this will supply (I am told less than 5%)

May I suggest we might not want to be dependent upon the French for even this small proportion of our needs given their proven tendency(Channel Islands) to use this as a lever in future "discussions"

The enterprise will be privately (Foreign?) owned and having doubtless been supported by the taxpayer will provide another lucrative money making scheme at the expense of the taxpayer.

Please do NOT allow this project to proceed.

In the timeframe envisaged, please direct technical and financial efforts to obtaining this order of improvement to our home grown and owned power generation be it conventional, green or (preferably) nuclear.
