**Categories:** Consultation Response

To the inspector.

I am writing to ask for your further intervention into stopping the Aquind Interconnector.

The decimation of botany and wildlife in the area of Langstone Harbour, the Portsmouth Solent and the inland route of the Interconnector is disproportionate to the benefit projected. The financial cost vs value of the Interconnector is not worth it.

The disruption to human and natural life on Portsea Island, loss of habitats, leisure spaces and traffic congestion is unacceptable.

Yours sincerely,  
Jackie Collins
