I object to this project.

It will:-

- Severely disrupt our City for years which will cause us economic harm
- Severely disturb and potentially ruin for ever some of our wildlife habitats
- Not provide energy security or give any guarantees to sustainable energy
- Provide more wealth to Russian Oligarchs

This project cannot be allowed to proceed.

I trust the inspectorate will be able to weigh the severe costs against the negligible benefits and also oppose it's progress.

Thank you

Mark Sapsford
