It was a relief when we thought Aquind had been stopped but awful upset to find it may still go ahead. All Portsmouth Council are opposed and both M.P.s. Thousands of people have signed petitions against Aquind. It's French so there could be danger of power cuts through strike action and look what they threatened in Jersey. British power is cheaper and greener. Agreeing to Aquind is not democratic. I understand finances may have a Russian source. Please, please support the wishes and needs of ordinary British people rather than rich foreigners.
