Subject: Objection to Aquind

Categories: Consultation Response

I am emailing to object to Aquind. I live in Milton, close to many areas which would be affected . The laying of the cables would be devastating to our native marine and shore fauna and flora. It would also be highly disruptive, especially as the route would go along one of the main routes onto Portsea Island. It would disturb toxic waste buried under Milton Common, which could have a huge impact on families nearby, as would digging up residential streets.

Aquind has already been found ,by the previous Secretary of State ,to be unjustified because of the damaging impacts to our city and environment, and nothing has changed. This needs to be stopped once and for all.
