Dear Sir / Madam

I am writing to you regarding Aquind interconnector project .

In my opinion this would be a disaster for Portsmouth and Waterlooville .

Their would-be years of distraction to already very busy area , terrible pollution, environmental disaster for people , wildlife etc .

How we can rely on French nuclear power ? How we can trust owners on Aquind with their connection to Russia in current political situation ?

We can NOT !

Please think about people of Portsmouth and surrounding areas ! Please care about our environment and put our interest first ! Not interest of corrupted billionaires !

We lived without that interconnector we can live without it in the future ! Let's invest more money in green power , lets build new / safe nuclear power station that are own by British people ! I am sure that there are other options then Aquind.

Lets Stop Aquind!

Kind regards

Szymon Soltysik-Zalinski
