**Categories:** Consultation Response

I would like to express my opposition to the installation of this cable. It seems wholly inappropriate to terminate this cable in an area which is so intensively used and surrounded by a high population, not to mention the adverse environmental consequences.

Also it makes no sense to increase our dependence on foreign sources of energy. We should be developing our own energy sources. This will not happen if we increasingly connection and dependance on continental suppliers.

I hope that you will continue to work to oppose the application to install this cable.

Sincerely

Jonathan Teuten
