Subject: Objection to Aquind in Portsmouth Uk

Categories: Consultation Response

Hello

I am writing to object to this proposed interconnector.

It is inconceivable that a company could rip up half of an island city. This will destroy homes, peoples livelihoods and the precious flora and fauna. The planned route will go through allotments that have taken years to nurture, though parks, commons and marshland.

It is very disturbing that the landing point at Eastney is on a well know MoD 'dumping ground' where there are numerous nasty elements buried of which I understand Asbestos being one of them. If undisturbed Asbestos is not harmful, even a slight disturbance can increase the likelihood of harm to people.

Due to being an island, currently if there is an accident the city can quickly become gridlocked with traffic. This is damaging to the mental health of residents and physical health due to the pollution, in an already heavily polluted city.

Please listen to the people and if this must proceed find an alternate route where this can come close to land without destroying a city.

I sincerely hope this does not proceed.

Regards

Ali Gregory
