Categories: Consultation Response

Sir,

I wish to object to the subject scheme on the following grounds:

1. The war in Ukraine has demonstrated the folly of being dependent on foreign sources for energy. This project offers no security of electricity supply as UK will not have ultimate control of supply.
2. The threat during construction to the eastern side of Portsea Island nature habitats is considerable. Southern Water are already demonstrating that large companies simply cannot be trusted with major environmental projects.
3. The disruption to life on a small overcrowded island will be considerable and lengthy.

Colin Williams.
