Subject: No to the interconnector

Categories: Consultation Response

I am totally against your proposal for an interconnector through Portsmouth and the surrounding area. It will not only cause a huge amount of stress for the residents of Portsmouth with its years of disruption but this will also effect the environment and wildlife. Businesses will also be hugely affected. I believe Aquind are only interested in how much money they can make from this and do not care about the effect it will have on people's lives and the environment. I bet if this pipeline was going past your back garden for years to come you would not like all the disruption and damage it would cause. So I say NO TO AQUIND INTERCONNECTOR.

Yours sincerely
Miss G Housley
