To whom it may concern

I write to register my strong objection to the Aquind proposal. This project will cause enormous disruption to important community and natural areas of Portsmouth - a city restricted in size and amenities by its status as an island.

Along with many other local people, I enjoy the city's green space, much of which (e.g. Milton Locks and Milton Common) will be severely damaged and disrupted by the enormous amount of work required for the interconnector. In addition, we have for many years run an allotment at Milton, and this area will be significantly affected by the work.

Furthermore, we enjoy walking in the open spaces to the north of the city that will also be carved up if the scheme goes ahead.

Please do not allow this disastrous project to happen. It will cause nothing but harm, and will permanently alter some of the most precious areas in our part of the south.

Best wishes

Anne England
