Dear recipient

No doubt you have received multiple letters that all raise deep concerns about the destruction of this project. It just does not make any sense.

As a psychotherapist I am deeply concerned about the impact this will have on people due to the loss of green spaces which are essential for mental well-being.

The concern about overall health is also evident, dipping up all kinds of materials under the surface of Portsmouth which would cause a National scandal let alone the actual affects in actual people. I see law suits in the air.

As an advocate for the environment and how we are now all aware of how precious these spaces are for our marine and bird species let alone the smaller insects and the like. I raise voice for all of them, Milton Common in particular is a haven for me due to the joy of being amongst these creatures.

Please stand up to people who want to profit through unnecessary destruction. There is other ways.

Kind Wishes

Lynda Bryer
