Categories: Consultation Response

Dear Sir,

I would be so grateful if you would consider the Aquind application and the objections to it, most carefully. As a Southsea resident, the objections that are closest to my heart are as follows:

1. Wildlife -both the affected sites at Milton Locks and the beautiful reserve at Farlington Marshes would be badly affected with devastating consequences to two of our very few green spaces.
2. Public health - two close family members are asthma sufferers. The air quality in Portsmouth is critically poor already and any increase in road traffic would be devastating.
3. Environment - I understand that digging the necessary trenches would unearth long buried rubbish dump resulting in exposure of asbestos and other toxic waste.
4. Damage to the value of my home - the current essential building of sea defences would be disrupted, increasing the risk of my home being flooded

Please help us protect our beautiful and historic city.

Yours faithfully
Nicky Fretwell
