**Categories:** Consultation Response

Dear Sirs

Once again, I wish to state my objection to the plan for the Aquind Connector to come ashore at Portsmouth to the intended sub station to be built at Lovedean.

There is so much cross party opposition to this project, and the reasons why this should not happen have all been stated before, it is an environmental disaster about to happen if it is agreed.

Please do not approve the planning for this project. Portsmouth cannot have the upheaval this project will cause, we are an island with only 3 roads in and out. The proposed route goes through the only green part of Portsea Island, under our Allotments, along one of the busiest roads, across unsafe and unknown dumps which will release toxins into the environment, across land reserved for migrating birds, through a Marsh which is an SSSI and on through suburbia and then farmland. The impact will be enormous for very little gain. Please do not approve this project.

Thank you

Mrs Christine Neal
